## About this manual

This manual contains service and reference information for the following ThinkPad® products.

ThinkPad L470

Machine Type (MT): 20J4, 20J5, 20JU, and 20JV

Use this manual along with the advanced diagnostic tests to troubleshoot problems.

**Important:** This manual is intended only for trained service technicians who are familiar with ThinkPad products. Use this manual along with the advanced diagnostic tests to troubleshoot problems effectively. Before servicing a ThinkPad product, be sure to read all the information under Chapter 1 “Safety information” on page 1 and Chapter 2 “Important service information” on page 19.

---

## Chapter 1. Safety information

This chapter presents following safety information that you need to be familiar with before you service a ThinkPad notebook computer.

- “General safety” on page 1
- “Electrical safety” on page 1
- “Safety inspection guide” on page 2
- “Handling devices that are sensitive to electrostatic discharge” on page 3
- “Grounding requirements” on page 4
- “Safety notices (multilingual translations)” on page 4

---

### General safety

Follow these rules to ensure general safety:

- Observe good housekeeping in the area of the machines during and after maintenance.
- When lifting any heavy object:
  1. Make sure that you can stand safely without slipping.
  2. Distribute the weight of the object equally between your feet.
  3. Use a slow lifting force. Never move suddenly or twist when you attempt to lift.
  4. Lift by standing or by pushing up with your leg muscles; this action removes the strain from the muscles in your back. *Do not attempt to lift any object that weighs more than 16 kg (35 lb) or that you think is too heavy for you.*
- Do not perform any action that causes hazards to the customer, or that makes the equipment unsafe.
- Before you start the machine, make sure that other service technicians and the customer's personnel are not in a hazardous position.
- Place removed covers and other parts in a safe place, away from all personnel, while you are servicing the machine.
- Keep your toolcase away from walk areas so that other people will not trip over it.
- Do not wear loose clothing that can be trapped in the moving parts of a machine. Make sure that your sleeves are fastened or rolled up above your elbows. If your hair is long, fasten it.
- Insert the ends of your necktie or scarf inside clothing or fasten it with a nonconductive clip, about 8 centimeters (3 inches) from the end.
- Do not wear jewelry, chains, metal-frame eyeglasses, or metal fasteners for your clothing.

**Attention:** Metal objects are good electrical conductors.

- Wear safety glasses when you are hammering, drilling, soldering, cutting wire, attaching springs, using solvents, or working in any other conditions that might be hazardous to your eyes.
- After service, reinstall all safety shields, guards, labels, and ground wires. Replace any safety device that is worn or defective.
- Reinstall all covers correctly before returning the machine to the customer.
- Fan louvers on the machine help to prevent overheating of internal components. Do not obstruct fan louvers or cover them with labels or stickers.

---

### Electrical safety

Observe the following rules when working on electrical equipment.

**Important:** Use only approved tools and test equipment. Some hand tools have handles covered with a soft material that does not insulate you when working with live electrical currents. Many customers have, near their equipment, rubber floor mats that contain small conductive fibers to decrease electrostatic discharges. Do not use this type of mat to protect yourself from electrical shock.

- Find the room emergency power-off (EPO) switch, disconnecting switch, or electrical outlet. If an electrical accident occurs, you can then operate the switch or unplug the power cord quickly.
- Do not work alone under hazardous conditions or near equipment that has hazardous voltages.
- Disconnect all power before:
  - Performing a mechanical inspection
  - Working near power supplies
  - Removing or installing main units
- Before you start to work on the machine, unplug the power cord. If you cannot unplug it, ask the customer to power-off the wall box that supplies power to the machine, and to lock the wall box in the off position.
- If you need to work on a machine that has *exposed* electrical circuits, observe the following precautions:
  - Ensure that another person, familiar with the power-off controls, is near you.

**Attention:** Another person must be there to switch off the power, if necessary.

- Use only one hand when working with powered-on electrical equipment; keep the other hand in your pocket or behind your back.

**Attention:** An electrical shock can occur only when there is a complete circuit. By observing the above rule, you may prevent a current from passing through your body.

- When using testers, set the controls correctly and use the approved probe leads and accessories for that tester.
- Stand on suitable rubber mats (obtained locally, if necessary) to insulate you from grounds such as metal floor strips and machine frames.

Observe the special safety precautions when you work with very high voltages; Instructions for these precautions are in the safety sections of maintenance information. Use extreme care when measuring high voltages.

- Regularly inspect and maintain your electrical hand tools for safe operational condition.
- Do not use worn or broken tools and testers.
- *Never assume* that power has been disconnected from a circuit. First, *check* that it has been powered off.
- Always look carefully for possible hazards in your work area. Examples of these hazards are moist floors, nongrounded power extension cables, power surges, and missing safety grounds.
- Do not touch live electrical circuits with the reflective surface of a plastic dental mirror. The surface is conductive; such touching can cause personal injury and machine damage.
- Do not service the following parts *with the power on* when they are removed from their normal operating places in a machine:
  - Power supply units
  - Pumps
  - Blowers and fans
  - Motor generators
  - Similar units as listed above
 This practice ensures correct grounding of the units.
- If an electrical accident occurs:
  - Use caution; do not become a victim yourself.
  - Switch off power.
  - Send another person to get medical aid.

---

## Safety inspection guide

The purpose of this inspection guide is to assist you in identifying potentially unsafe conditions. As each machine was designed and built, required safety items were installed to protect users and service technicians from injury. This guide addresses only those items. You should use good judgment to identify potential safety hazards due to attachment of non-ThinkPad features or options not covered by this inspection guide.

If any unsafe conditions are present, you must determine how serious the apparent hazard could be and whether you can continue without first correcting the problem.

Consider these conditions and the safety hazards they present:

- Electrical hazards, especially primary power (primary voltage on the frame can cause serious or fatal electrical shock)
- Explosive hazards, such as a damaged cathode ray tube (CRT) face or a bulging capacitor
- Mechanical hazards, such as loose or missing hardware

To determine whether there are any potentially unsafe conditions, use the following checklist at the beginning of every service task. Begin the checks with the power off, and the power cord disconnected.

Checklist:

1. Check exterior covers for damage (loose, broken, or sharp edges).
2. Turn off the computer. Disconnect the power cord.
3. Check the power cord for:
  - a. A third-wire ground connector in good condition. Use a meter to measure third-wire ground continuity for 0.1 ohm or less between the external ground pin and the frame ground.
  - b. The power cord should be the authorized type specified for your computer. Go to: <http://www.lenovo.com/serviceparts-lookup>
  - c. Insulation must not be frayed or worn.
4. Check for cracked or bulging batteries.
5. Remove the cover.
6. Check for any obvious non-ThinkPad alterations. Use good judgment as to the safety of any non-ThinkPad alterations.
7. Check inside the unit for any obvious unsafe conditions, such as metal filings, contamination, water or other liquids, or signs of fire or smoke damage.
8. Check for worn, frayed, or pinched cables.
9. Check that the power-supply cover fasteners (screws or rivets) have not been removed or tampered with.

---

## Handling devices that are sensitive to electrostatic discharge

Any computer part containing transistors or integrated circuits (ICs) should be considered sensitive to electrostatic discharge (ESD). ESD damage can occur when there is a difference in charge between objects. Protect against ESD damage by equalizing the charge so that the machine, the part, the work mat, and the person handling the part are all at the same charge.

### Notes:

1. Use product-specific ESD procedures when they exceed the requirements noted here.
2. Make sure that the ESD protective devices you use have been certified (ISO 9000) as fully effective.

When handling ESD-sensitive parts:

- Keep the parts in protective packages until they are inserted into the product.
- Avoid contact with other people.
- Wear a grounded wrist strap against your skin to eliminate static on your body.
- Prevent the part from touching your clothing. Most clothing is insulative and retains a charge even when you are wearing a wrist strap.
- Use a grounded work mat to provide a static-free work surface. The mat is especially useful when handling ESD-sensitive devices.
- Select a grounding system, such as those listed below, to provide protection that meets the specific service requirement.

**Note:** The use of a grounding system to guard against ESD damage is desirable but not necessary.

- Attach the ESD ground clip to any frame ground, ground braid, or green-wire ground.

- When working on a double-insulated or battery-operated system, use an ESD common ground or reference point. You can use coax or connector-outside shells on these systems.
- Use the round ground prong of the ac plug on ac-operated computers.

---

## Grounding requirements

Electrical grounding of the computer is required for operator safety and correct system function. Proper grounding of the electrical outlet can be verified by a certified electrician.

---

## Safety notices (multilingual translations)

The safety notices in this section are provided in the following languages:

- English
- Arabic
- Brazilian Portuguese
- French
- German
- Hebrew
- Japanese
- Korean
- Spanish
- Traditional Chinese

### DANGER

**Before the computer is powered on after FRU replacement, make sure that all screws, springs, and other small parts are in place and are not left loose inside the computer. Verify this by shaking the computer and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.**

### DANGER

**Some standby batteries contain a small amount of nickel and cadmium. Do not disassemble a standby battery, recharge it, throw it into fire or water, or short-circuit it. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.**

### DANGER

**The battery pack contains small amounts of nickel. Do not disassemble it, throw it into fire or water, or short-circuit it. Dispose of the battery pack as required by local ordinances or regulations. Use only the battery in the appropriate parts listing when replacing the battery pack. Use of an incorrect battery can result in ignition or explosion of the battery.**

## DANGER

The lithium battery can cause a fire, an explosion, or a severe burn. Do not recharge it, remove its polarized connector, disassemble it, heat it above 100°C (212°F), incinerate it, or expose its cell contents to water. Dispose of the battery as required by local ordinances or regulations. Use only the battery in the appropriate parts listing. Use of an incorrect battery can result in ignition or explosion of the battery.

## DANGER

If the LCD breaks and the fluid from inside the LCD gets into your eyes or on your hands, immediately wash the affected areas with water for at least 15 minutes. Seek medical care if any symptoms from the fluid are present after washing.

## DANGER

To avoid shock, do not remove the plastic cover that protects the lower part of the inverter card.

## DANGER

Though the main batteries have low voltage, a short-circuited or grounded battery can produce enough current to burn personnel or combustible materials.

## DANGER

Unless hot swap is allowed for the FRU being replaced, do as follows before removing it: power off the computer, unplug all power cords from electrical outlets, remove the battery pack, and disconnect any interconnecting cables.

قبل اعادة تشغيل الحاسب بعد الانتهاء من استبدال FRU، تأكد من أنه قد تم اعادة كل من المسامير و السوست وكل الأجزاء الصغيرة الأخرى في أماكنهم ولم يتم فقدم داخل الحاسب. ويمكن التحقق من ذلك عن طريق هز الحاسب والاستماع لأي صوت صاخب يصدر منه. قد تؤدي الأجزاء أو الرقائق المعدنية الى حدوث دائرة قصر.

خطر

تحتوي بعض البطاريات الاحتياطية على كمية صغيرة من مادتي النيكل والكاديوم. لا تقم بفك أو إعادة شحن البطارية الاحتياطية ولا تقم أيضا بالقائها في النار أو الماء ولا تتسبب في احدث دائرة قصر بها. قم بالتخلص من البطارية كما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

خطر

تحتوي حزمة البطارية على كمية صغيرة من مادة النيكل. لا تقم بفكها أو القاءها في النار أو الماء ولا تتسبب في احدث دائرة قصر بها. تخلص من حزمة البطارية وفقا لما هو موضح في القوانين المحلية. قم، عند استبدال حزمة البطارية، باستخدام الأنواع المحددة فقط والتي يوصى باستخدامها. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

خطر

قد تتسبب بطارية الليثيوم في حدوث حريق أو انفجار أو حدوث حروق شديدة. لا تقم بإعادة شحن البطارية أو إزالة موصل الاستقطاب الخاص بها ولا تحاول أيضا فكها أو تسخينها لأكثر من ١٠٠ درجة مئوية (٢١٢١ فهرنهايت) أو حرقها أو تعريض محتويات الخانة الخاصة بها للماء. قم بالتخلص من البطارية وفقا لما هو موضح في القوانين المحلية. استخدم نوع البطارية المحدد والذي يوصى باستخدامه. حيث أنه قد يؤدي استخدام نوع بطارية غير صحيح الى اشتعالها أو انفجارها.

خطر

إذا ما انكسرت شاشة LCD ولامس السائل الداخلي عينيك أو يديك، قم في الحال بغسلهما بالماء لمدة لا تقل عن ١٥ دقيقة. إذا ما وجدت أي أعراض بعد الغسل اطلب عندئذ المساعدة الطبية.

خطر

لتجنب التعرض لأي صدمات، لا تقم بإزالة الغطاء البلاستيكي الذي يحمي الجزء الأسفل من بطاقة العاكس.

خطر

على الرغم من أن البطاريات الرئيسية يكون لها جهد منخفض، إلا أنه قد تقوم البطاريات التي حدث قصور بها أو التي تم توصيلها أرضيا بإصدار تيار يكفي لحدوث حروق للأفراد أو تعرض المواد القابلة للاشتعال للحريق.

خطر

ما لم يتم السماح بالتبديل الفوري لأي FRU الجاري استبداله بدون ضرورة اغلاق النظام، قم بتنفيذ ما يلي قبل ازالته. قم بإيقاف تشغيل الحاسب ونزع كل أسلاك الطاقة من المخارج الكهربائية وقم أيضا بإزالة حزمة البطارية ثم قم بفصل أي كابلات متصلة.

#### PERIGO

Antes de ligar o computador após a substituição da FRU, certifique-se de que todos os parafusos, molas e outras peças pequenas estejam no lugar e não estejam soltos dentro do computador. Verifique isso sacudindo o computador e procurando ouvir sons de peças soltas. Peças metálicas ou lascas de metal podem causar curto-circuito.

#### PERIGO

Algumas baterias reserva contêm uma pequena quantidade de níquel e cádmio. Não desmonte uma bateria reserva, recarregue-a, jogue-a no fogo ou na água, ou deixe-a entrar em curto-circuito. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

#### PERIGO

O pacote da bateria contém uma pequena quantidade de níquel. Não o desmonte, jogue-o no fogo ou na água, ou deixe-o entrar em curto-circuito. Descarte o pacote da bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas ao substituir o pacote da bateria. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

#### PERIGO

A bateria de lítio pode causar incêndio, explosão ou graves queimaduras. Não a recarregue, remova seu conector polarizado, desmonte-a, aqueça-a acima de 100°C (212°F), incinere-a, ou exponha o conteúdo de sua célula à água. Descarte a bateria conforme requerido pelas leis ou regulamentos locais. Use somente a bateria nas partes listadas apropriadas. O uso de uma bateria incorreta pode resultar em combustão ou explosão da bateria.

## PERIGO

Se o LCD quebrar e o fluido de dentro dele entrar em contato com seus olhos ou com suas mãos, lave as áreas afetadas imediatamente com água durante pelo menos 15 minutos. Procure cuidados médicos se algum sintoma causado pelo fluido surgir após a lavagem.

## PERIGO

Para evitar choque elétrico, não remova a capa plástica que protege a parte inferior da placa inversora.

## PERIGO

Embora as principais baterias possuam baixa voltagem, uma bateria em curto-circuito ou aterrada pode produzir corrente o bastante para queimar materiais de pessoal ou inflamáveis.

## PERIGO

A menos que uma hot swap seja permitida para a FRU que está sendo substituída, faça o seguinte antes de removê-la: desligue o computador, desconecte todos os cabos de energia das tomadas, remova o pacote de baterias e desconecte quaisquer cabos de interconexão.

## DANGER

Avant de remettre l'ordinateur sous tension après remplacement d'une unité en clientèle, vérifiez que tous les ressorts, vis et autres pièces sont bien en place et bien fixées. Pour ce faire, secouez l'unité et assurez-vous qu'aucun bruit suspect ne se produit. Des pièces métalliques ou des copeaux de métal pourraient causer un court-circuit.

## DANGER

Certaines batteries de secours contiennent du nickel et du cadmium. Ne les démontez pas, ne les rechargez pas, ne les exposez ni au feu ni à l'eau. Ne les mettez pas en court-circuit. Pour les mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la pile de sauvegarde ou celle de l'horloge temps réel, veillez à n'utiliser que les modèles cités dans la liste de pièces détachées adéquate. Une batterie ou une pile inappropriée risque de prendre feu ou d'exploser.

## DANGER

La batterie contient du nickel. Ne la démontez pas, ne l'exposez ni au feu ni à l'eau. Ne la mettez pas en court-circuit. Pour la mettre au rebut, conformez-vous à la réglementation en vigueur. Lorsque vous remplacez la batterie, veillez à n'utiliser que les modèles cités dans la liste de pièces détachées adéquate. En effet, une batterie inappropriée risque de prendre feu ou d'exploser.

## DANGER

La pile de sauvegarde contient du lithium. Elle présente des risques d'incendie, d'explosion ou de brûlures graves. Ne la rechargez pas, ne retirez pas son connecteur polarisé et ne la démontez pas. Ne l'exposez pas à une température supérieure à 100°C, ne la faites pas brûler et n'en exposez pas le contenu à l'eau. Mettez la pile au rebut conformément à la réglementation en vigueur. Une pile inappropriée risque de prendre feu ou d'exploser.

## DANGER

Si le panneau d'affichage à cristaux liquides se brise et que vous recevez dans les yeux ou sur les mains une partie du fluide, rincez-les abondamment pendant au moins quinze minutes. Consultez un médecin si des symptômes persistent après le lavage.

## DANGER

Afin d'éviter tout risque de choc électrique, ne retirez pas le cache en plastique protégeant la partie inférieure de la carte d'alimentation.

## DANGER

Bien que le voltage des batteries principales soit peu élevé, le court-circuit ou la mise à la masse d'une batterie peut produire suffisamment de courant pour brûler des matériaux combustibles ou causer des brûlures corporelles graves.

#### **DANGER**

Si le remplacement à chaud n'est pas autorisé pour l'unité remplaçable sur site que vous remplacez, procédez comme suit avant de retirer l'unité : mettez l'ordinateur hors tension, débranchez tous les cordons d'alimentation des prises de courant, retirez le bloc de batterie et déconnectez tous les câbles d'interconnexion.

#### **VORSICHT**

Bevor nach einem FRU-Austausch der Computer wieder angeschlossen wird, muß sichergestellt werden, daß keine Schrauben, Federn oder andere Kleinteile fehlen oder im Gehäuse vergessen wurden. Der Computer muß geschüttelt und auf Klappergeräusche geprüft werden. Metallteile oder-splitter können Kurzschlüsse erzeugen.

#### **VORSICHT**

Die Bereitschaftsbatterie, die sich unter dem Diskettenlaufwerk befindet, kann geringe Mengen Nickel und Cadmium enthalten. Sie darf nur durch die Verkaufsstelle oder den IBM Kundendienst ausgetauscht werden. Sie darf nicht zerlegt, wiederaufgeladen, kurzgeschlossen, oder Feuer oder Wasser ausgesetzt werden. Die Batterie kann schwere Verbrennungen oder Verätzungen verursachen. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Bereitschafts- oder Systembatterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

#### **VORSICHT**

Akkus enthalten geringe Mengen von Nickel. Sie dürfen nicht zerlegt, wiederaufgeladen, kurzgeschlossen, oder Feuer oder Wasser ausgesetzt werden. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Batterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

#### **VORSICHT**

Die Systematterie ist eine Lithiumatterie. Sie kann sich entzünden, explodieren oder schwere Verbrennungen hervorrufen. Batterien dieses Typs dürfen nicht aufgeladen, zerlegt, über 100°C erhitzt oder verbrannt werden. Auch darf ihr Inhalt nicht mit Wasser in Verbindung gebracht oder der zur richtigen Polung angebrachte Verbindungsstecker entfernt werden. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Beim Ersetzen der Batterie nur Batterien des Typs verwenden, der in der Ersatzteilliste aufgeführt ist. Der Einsatz falscher Batterien kann zu Entzündung oder Explosion führen.

#### VORSICHT

Die Leuchtstoffröhre im LCD-Bildschirm enthält Quecksilber. Bei der Entsorgung die örtlichen Bestimmungen für Sondermüll beachten. Der LCD-Bildschirm besteht aus Glas und kann zerbrechen, wenn er unsachgemäß behandelt wird oder der Computer auf den Boden fällt. Wenn der Bildschirm beschädigt ist und die darin befindliche Flüssigkeit in Kontakt mit Haut und Augen gerät, sollten die betroffenen Stellen mindestens 15 Minuten mit Wasser abgespült und bei Beschwerden anschließend ein Arzt aufgesucht werden.

#### VORSICHT

Aus Sicherheitsgründen die Kunststoffabdeckung, die den unteren Teil der Spannungswandlerplatine umgibt, nicht entfernen.

#### VORSICHT

Obwohl Hauptbatterien eine niedrige Spannung haben, können sie doch bei Kurzschluß oder Erdung genug Strom abgeben, um brennbare Materialien zu entzünden oder Verletzungen bei Personen hervorzurufen.

#### VORSICHT

Wenn ein Austausch der FRU bei laufendem Betrieb nicht erlaubt ist, gehen Sie beim Austausch der FRU wie folgt vor: Schalten Sie den Computer aus, ziehen Sie alle Netzkabel von den Netzsteckdosen ab, entfernen Sie den Akku und ziehen Sie alle miteinander verbundenen Kabel ab.

סכנה

לפני הפעלת המחשב לאחר החלפת FRU יש לוודא שכל הברגים, הקפיצים, וחלקים קטנים אחרים נמצאים במקומם ואינם חופשיים לזוז בתוך המחשב. כדי לוודא זאת, יש לטלטל את המחשב ולחקשיב לגילוי קולות שקשוק. חלקי או שבבי מתכת עלולים לגרום לקצרים חשמליים.

סכנה

סוללות המתנה מסוימות מכילות כמות קטנה של ניקל וקדמיום. אין לפרק סוללת המתנה, לטעון אותה מחדש, להשליך אותה לאש או למים או לקצר אותה. יש לסלק את הסוללה כנדרש על ידי התקנות והחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימה. שימוש בסוללה לא מתאימה עלול לגרום להצתה או התפוצצות של הסוללה.

סכנה

מארז הסוללה מכיל כמות קטנה של ניקל וקדמיום. אין לפרק את מארז הסוללה, להשליך אותו לאש או למים או לקצר אותו. יש לסלק את מארז הסוללה כנדרש על ידי התקנות והחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימה בזמן החלפת מארז הסוללה. שימוש בסוללה לא מתאימה עלול לגרום להצתה או התפוצצות של הסוללה.

סכנה

סוללת הליתיום עלולה לגרום לשריפה, להתפוצצות או לכוויות קשות. אין לטעון אותה מחדש, לסלק את המחבר המקוטב שלה, לפרק אותה או לחמם אותה לטמפרטורה העולה על 100 מעלות צלזיוס. אין לשרוף את הסוללה ואין לחשוף את תוכן התא למים. יש לסלק את הסוללה כנדרש בתקנות ובחוקים המקומיים. יש להשתמש רק בסוללה המופיעה ברשימת החלקים המתאימים. שימוש בסוללה אחרת עלול לגרום לסכנת שריפה או התפוצצות.

סכנה

אם מסך הגביש הנזולי (LCD) נשבר והנזול מתוך המסך בא במגע עם עיניכם או יריכם, שטפו את האזורים הנגועים מיד במים במשך 15 דקות לפחות. פנו לקבלת עזרה רפואית אם תסמינים הנובעים מחמצע עם הנזול נמשכים לאחר הטיפול.

סכנה

כדי למנוע התחשמלות, אין להסיר את מכסה הפלסטיק המגן על חלקו התחתון של הכרטיס החמור.

סכנה

אף שהסוללות הראשיות הן בעלות מותח נמוך, סוללה מקוצרת או מוארכת עלולה להפיק זרם מספיק לגרימת כוויות או להצתת חומרים דליקים.

סכנה

אלא אם כן מותרת 'החלפה חמה' של ה-FRU המוחלף, פעלו כדלהלן לפני חסרתו: כבו את המחשב, נתקו את כל כבלי החשמל מחשקעים, הוציאו את מארז הסוללות ונתקו את כל הכבלים מחוברים.

## 危険

FRUの交換後、ThinkPadの電源を入れる前に、ねじ、パネ、その他の小さな部品がすべて正しい位置にあり、またThinkPadの内部で緩んでいないことを確認してください。  
これを確認するには、ThinkPadを振って、カチャカチャと音がしないか確かめます。金属部品や金属破片はショートの原因になることがあります。

## 危険

予備バッテリーの中には少量のニッケルとカドミウムが含まれているものがあります。したがって、予備バッテリーの分解、再充電、火または水の中への投棄、またはショートさせることは決して行わないでください。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

## 危険

バッテリー・パックには少量のニッケルが含まれています。バッテリー・パックを分解したり、火または水の中に投げ込んだり、ショートさせないでください。バッテリー・パックの廃棄にあたっては、地方自治体の条例または規則に従ってください。バッテリー・パックを交換するときは、適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

## 危険

リチウム・バッテリーは、火災、爆発、または重症のやけどを引き起こすことがあります。バックアップ・バッテリーの充電、その極性コネクタの取り外し、バッテリー本体の分解、100°C (212°F) 以上への加熱、焼却、電池の中身を水に浸すことはしないでください。バッテリーを廃棄する場合は地方自治体の条例に従ってください。適切なパーツ・リストにあるバッテリーだけを使用してください。誤ったバッテリーを使用すると、バッテリーが発火したり、爆発したりすることがあります。

## 危険

LCDが破損し、LCDの中の液体が目に入ったり、手に触れたりした場合は、液体が触れた部分を少なくとも15分間洗い流してください。洗い流した後に、液体によって何らかの症状が現れた場合は、医師の治療を受けてください。

## 危険

感電を防ぐため、インバーター・カードの下部を保護しているプラスチック・カバーを外さないでください。

## 危険

メイン・バッテリーの電圧は低くても、ショートしたり、接地したバッテリーが、作業者にやけどを負わせたり、可燃物を燃やすだけの電流を発生させる場合があります。

## 危険

交換しようとしている FRU がホット・スワップに対応していない場合、それを取り外す前に、コンピューターの電源をオフにし、すべての電源コードをコンセントから抜き、バッテリー・バックを取り外して、相互接続しているケーブルをすべて切り離してください。

## 위험

FRU를 교체하고 나서 컴퓨터 전원을 켜기 전에 모든 나사, 스프링 및 기타 작은 부품들이 올바른 위치에 있는지, 컴퓨터 내부에 단단하게 연결되어 있는지 확인하십시오. 컴퓨터를 흔들어 달각거리는 소리가 나지 않는지 확인하십시오. 금속 부품 또는 금속 조각은 누전을 일으킬 수 있습니다.

## 위험

일부 보조 배터리에는 소량의 니켈 및 카드뮴이 포함되어 있습니다. 보조 배터리를 분해하거나, 다시 충전하거나, 불 또는 물에 던지거나, 단락시키지 마십시오. 배터리 팩을 폐기할 때에는 해당 지역의 법률 규정을 따르십시오. 배터리 팩을 교체할 때에는 올바른 배터리만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

## 위험

배터리 팩에는 소량의 니켈이 포함되어 있습니다. 배터리 팩을 분해하거나, 불 또는 물에 던지거나, 단락시키지 마십시오. 배터리 팩을 폐기할 때에는 해당 지역의 법률 규정을 따르십시오. 배터리 팩을 교체할 때에는 올바른 배터리만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

## 위험

리튬 배터리는 화재, 폭발 또는 심각한 화상을 일으킬 수 있습니다. 리튬 배터리를 다시 충전하거나, 극성 커넥터를 제거하거나, 분해하거나, 100C(212F) 이상으로 가열하거나, 소각하거나, 전지 내용물을 물에 노출시키지 마십시오. 배터리를 폐기할 때에는 해당 지역을 법률 규정을 따르십시오. 올바른 배터리만 사용하십시오. 올바르지 않은 배터리를 사용하면 배터리가 발화되거나 폭발할 수 있습니다.

위험

LCD가 파손되어 LCD 내부의 액체가 눈에 들어가거나 손에 묻으면 즉시 깨끗한 물로 15분 이상 닦아 내십시오. 씻은 후에 조금이라도 이상을 느끼면 즉시 병원에 가서 의사의 진찰을 받아야 합니다.

위험

전기적 위험을 방지하려면 인버터 카드의 아래 부분을 보호하는 플라스틱 덮개를 제거하지 마십시오.

위험

기본 배터리의 전압은 낮지만, 단락되거나 접지된 배터리는 화상을 입히기에 충분한 전류와 가연성 물질을 발생시킬 수 있습니다.

위험

FRU 교체 시 Hot Swap이 지원되지 않는 경우, FRU를 제거하기 전에 컴퓨터의 전원을 끄고, 전기 콘센트에서 전원 코드를 분리하고, 배터리를 제거한 후, 연결된 모든 케이블을 분리하십시오.

PELIGRO

Antes de encender el sistema despues de sustituir una FRU, compruebe que todos los tornillos, muelles y demás piezas pequeñas se encuentran en su sitio y no se encuentran sueltas dentro del sistema. Compruébelo agitando el sistema y escuchando los posibles ruidos que provocarían. Las piezas metálicas pueden causar cortocircuitos eléctricos.

PELIGRO

Algunas baterías de reserva contienen una pequeña cantidad de níquel y cadmio. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

PELIGRO

Las baterías contienen pequeñas cantidades de níquel. No las desmonte, ni recargue, ni las eche al fuego o al agua ni las cortocircuite. Deséchelas tal como dispone la normativa local. Utilice sólo baterías que se encuentren en la lista de piezas al sustituir la batería. La utilización de una batería no apropiada puede provocar la ignición o explosión de la misma.

#### PELIGRO

La batería de repuesto es una batería de litio y puede provocar incendios, explosiones o quemaduras graves. No la recargue, ni quite el conector polarizado, ni la desmonte, ni caliente por encima de los 100°C (212°F), ni la incinere ni exponga el contenido de sus celdas al agua. Deséchela tal como dispone la normativa local.

#### PELIGRO

Si la LCD se rompe y el fluido de su interior entra en contacto con sus ojos o sus manos, lave inmediatamente las áreas afectadas con agua durante 15 minutos como mínimo. Obtenga atención médica si se presenta algún síntoma del fluido después de lavarse.

#### PELIGRO

Para evitar descargas, no quite la cubierta de plástico que rodea la parte baja de la tarjeta invertida.

#### PELIGRO

Aunque las baterías principales tienen un voltaje bajo, una batería cortocircuitada o con contacto a tierra puede producir la corriente suficiente como para quemar material combustible o provocar quemaduras en el personal.

#### PELIGRO

Salvo que se permita el intercambio en caliente para la unidad sustituible localmente, realice lo siguiente antes de extraerla: apague el sistema, desconecte todos los cables de alimentación de las tomas de alimentación eléctrica, extraiga la batería y desconecte los cables de interconexión.

危險

完成 FRU 更換之後，在開啟電腦的電源之前，請確定所有螺絲、彈簧及其他小零件都已歸位，沒有遺留在電腦內部。  
若要確認這一點，請搖晃電腦，聽聽看是否有卡嗒的聲響。  
金屬零件或鑄鍊的火花會造成電線短路。

危險

部分備用電池含有微量的鎳和鎘。請勿拆開備用電池、再充電、丟入火或水中，或使其形成短路。請按照當地法令或規定來棄置電池。  
僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

危險

電池套件含有微量的鎳。請勿拆開電池套件、丟入火或水中，或使其形成短路。請按照當地法令或規定來棄置電池套件。  
更換電池套件時，僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

危險

鋰電池會導致起火、爆炸或嚴重燒傷。請勿再充電、拔除其電極接頭、拆開、加熱超過 100°C (212°F)、焚燒，或讓電池組成物浸到水。請按照當地法令或規定來棄置電池。  
僅限使用零件清單中的電池。使用不適當的電池會導致電池起火或爆炸。

危險

如果 LCD 破裂導致 LCD 流出的液體沾到您的眼睛或手，請立即以清水沖洗沾染部位至少 15 分鐘。如果在清洗後出現該液體所造成的任何症狀，請就醫治療。

危險

為避免電擊，請勿拆下轉換卡下面的塑膠護蓋。

危險

雖然主電池的電壓很低，但短路或接地電池所產生的電流，仍足以使人燒傷或使可燃物質起火。

危險

除非 FRU 允許以熱抽換來替換，否則請依下列方式將其移除：將電腦關機，拔除插座上所有電源線，移除電池包，並拔開任何交互連接的線材。

---

## Chapter 2. Important service information

This chapter introduces following important service information that applies to all machine types supported by this manual:

- “Strategy for replacing FRUs” on page 19
  - “Strategy for replacing a hard disk drive or a solid-state drive” on page 19
  - “Important notice for replacing a system board” on page 20
  - “How to use error message” on page 20
- “Strategy for replacing FRUs for CTO, special-bid, and standard models” on page 20
  - “Product definition” on page 20
  - “FRU identification” on page 20

### Important:

- If the computer is equipped with both a hard disk drive and an M.2 solid-state drive, do not use the M.2 solid-state drive as a bootable device. The M.2 solid-state drive is designed and developed for “cache” function purpose only.
- Advise customers to contact the Lenovo® Customer Support Center if they need any assistance in obtaining or installing any software fixes, drivers, and Unified Extensible Firmware Interface basic input output system (UEFI BIOS) downloads. Telephone numbers for Lenovo Support are available at: <http://www.lenovo.com/support/phone>
- System Disassembly/Reassembly videos that show the FRU removals or replacements for the Lenovo authorized service technicians are available in the following support site: <http://www.lenovoservicetraining.com/ion/>

---

## Strategy for replacing FRUs

### Before replacing parts:

Ensure that all software fixes, drivers, and UEFI BIOS downloads are installed before replacing any FRUs listed in this manual.

After a system board is replaced, ensure that the latest UEFI BIOS is loaded to the system board before completing the service action.

To download software fixes, drivers, and UEFI BIOS, go to <http://www.lenovo.com/ThinkPadDrivers> and follow the instructions on the screen.

Use the following strategy to prevent unnecessary expense for replacing and servicing FRUs:

- If you are instructed to replace a FRU but the replacement does not correct the problem, reinstall the original FRU before you continue.
- Some computers have both a processor board and a system board. If you are instructed to replace either the processor board or the system board, and replacing one of them does not correct the problem, reinstall that board, and then replace the other one.
- If an adapter or a device consists of more than one FRU, any of the FRUs might be the cause of the error. Before replacing the adapter or device, remove the FRUs, one by one, to see if the symptoms change. Replace only the FRU that changed the symptoms.

## Strategy for replacing a hard disk drive or a solid-state drive

Always try to run a low-level format before replacing a hard disk drive or a solid-state drive. This will cause all customer data on the drive to be lost. Be sure that the customer has a current backup of the data before doing this task.

**Attention:** The drive startup sequence in the computer you are servicing may have been changed. Be extremely careful during write operations such as copying, saving, or formatting. If you select an incorrect drive, data or programs can be overwritten.

## Important notice for replacing a system board

Some components mounted on a system board are very sensitive. Improper handling of a system board can damage those components, and might cause a system malfunction.

**Attention:** When handling a system board:

- Do not drop a system board or apply any excessive force to it.
- Avoid rough handling of any kind.
- Avoid bending a system board and hard pushing to prevent cracking at each ball-grid-array (BGA) chipset.

## How to use error message

Use the error codes displayed on the screen to diagnose failures. If more than one error code is displayed, begin the diagnosis with the first error code. Whatever causes the first error code may also cause false error codes. If no error code is displayed, see whether the error symptom is listed in the Symptom-to-FRU Index for the computer you are servicing.

---

## Strategy for replacing FRUs for CTO, special-bid, and standard models

This topic provides information about the model types and FRU identification.

### Product definition

This topic introduces different model types and how to identify each type.

#### Dynamic configure-to-order (CTO) model

This model provides the ability for a customer to configure a Lenovo solution from a Web site, and have this configuration sent to fulfillment, where it is built and shipped directly to the customer. The machine label and eSupport will load these products as the 4-character MT, 4-character model, and 2-character country code. The model is “CTO1” and the default country code is “WW” (example: 20AACTO1WW).

#### Special-bid model

This is a unique configuration that has been negotiated between Lenovo and the customer. A unique machine type model (MTM) consists of a 4-character MT, a 4-character model, and a numeric 2-character country code is provided to the customer to place orders (example: 20AA000955). The country code assigned is numeric and does not designate a specific country or region. The custom model factsheet for the MTM indicates which country the special bid MTM is set up for. Special-bid offering is not generally announced.

#### Standard model

Standard models (fixed configuration) are announced and offered to all customers. The MTM portion of the machine label consists of a 4-character MT, a 4-character model, and an alphabetic 2-character country code. The country code assigned is alphabetic and represents a designated country or region (example: 20AA0009UK).

## FRU identification

Use Lenovo eSupport to identify major FRUs, FRU part numbers, and FRU descriptions for a product at an MT - serial number level. Examples of major FRUs are hard disk drive, system board, and liquid crystal display (LCD).

To identify the major FRUs for a product, do the following:

1. Go to:  
<http://support.lenovo.com/ibasepartslookup>
2. Type the Machine Type and Serial Number in the corresponding fields.
3. Click **Submit**.

eSupport also can be used to view the general FRU list for a product. The FRU list is a general list of components and does not contain specific model information.

To get the general FRU list for a product, do the following:

1. Go to:  
<http://www.lenovo.com/support>
2. Follow the instructions on the screen to select a product.
3. Click the **Product & Parts** tab.
4. Select **System Service Parts** to view a general FRU list.

---

## Chapter 3. General checkout

This chapter introduces following information:

- “What to do first” on page 23
- “Checkout guide” on page 24
  - “Diagnosing problems” on page 24
  - “Quick test programs” on page 25
  - “UEFI diagnostic program” on page 25
  - “Bootable diagnostic programs” on page 26
- “Power system checkout” on page 27

Before you go to the checkout guide, be sure to read the following important notes.

### Important notes:

- **Only certified trained personnel should service the computer.**
- **Before replacing any FRU, read the entire page on removing and replacing FRUs.**
- **When you replace FRUs, it is recommended use new nylon-coated screws.**
- **Be extremely careful during such write operations as copying, saving, or formatting.** The sequence of the drives in the computer that you are servicing might have been altered. If you select an incorrect drive, data or programs might be overwritten.
- **Replace a FRU only with another FRU of the correct model.** When you replace a FRU, ensure that the model of the machine and the FRU part number are correct by referring to the Web site: <http://www.lenovo.com/serviceparts-lookup>
- **A FRU should not be replaced because of a single, unreproducible failure.** Single failures can occur for a variety of reasons that have nothing to do with a hardware defect, such as cosmic radiation, electrostatic discharge, or software errors. Consider replacing a FRU only when a problem recurs. If you suspect that a FRU is defective, clear the error log and run the test again. If the error does not recur, do not replace the FRU.
- **Be careful not to replace a nondefective FRU.**

---

## What to do first

When you return a FRU, you must include the following information in the parts exchange form or parts return form that you attach to it:

1. Name and phone number of service technician
2. Date of service
3. Date on which the machine failed
4. Date of purchase
5. Failure symptoms, error codes appearing on the display, and beep symptoms
6. Procedure index and page number in which the failing FRU was detected
7. Failing FRU name and part number
8. Machine type, model number, and serial number
9. Customer's name and address

**Note:** During the warranty period, the customer may be responsible for repair costs if the computer damage was caused by misuse, accident, modification, unsuitable physical or operating environment, or improper maintenance by the customer. Following is a list of some common items that are not covered under warranty and some symptoms that might indicate that the system was subjected to stress beyond normal use.

Before checking problems with the computer, determine whether the damage is covered under the warranty by referring to the following list:

**The following are not covered under warranty:**

- LCD panel cracked from the application of excessive force or from being dropped
- Scratched (cosmetic) parts
- Distortion, deformation, or discoloration of the cosmetic parts
- Plastic parts, latches, pins, or connectors that have been cracked or broken by excessive force
- Damage caused by liquid spilled into the system
- Damage caused by the improper insertion of a personal-computer card (PC card) or the installation of an incompatible card
- Improper disc insertion or use of an external optical drive
- Fuses blown by attachment of a nonsupported device
- Forgotten computer password (making the computer unusable)
- Sticky keys caused by spilling a liquid onto the keyboard
- Use of an incorrect ac power adapter on laptop products

**The following symptoms might indicate damage caused by nonwarranted activities:**

- Missing parts might be a symptom of unauthorized service or modification.
- Check for obvious damage to a hard disk drive. If the spindle of a hard disk drive becomes noisy, the hard disk drive might have been dropped or subject to excessive force.

---

## Checkout guide

Use the following procedures as a guide in identifying and correcting problems with the ThinkPad notebook computers.

**Note:** The diagnostic tests are intended to test only ThinkPad products. The use of non-ThinkPad products, prototype cards, or modified options can lead to false indications of errors and invalid system responses.

1. Identify the failing symptoms in as much detail as possible.
2. Verify the symptoms. Try to re-create the failure by running the diagnostic test or by repeating the operation.

## Diagnosing problems

Many computer problems can be solved without outside assistance. If you experience a problem with your computer, the first place to start is the troubleshooting information in your computer documentation. If you suspect a software problem, see the documentation, including readme files and help information systems, that come with the operating system or program. ThinkPad notebook computers come with a set of diagnostic programs that you can use to help you identify hardware problems.

### Diagnosing problems with Lenovo Solution Center on the Windows 7 operating system

Lenovo Solution Center is preinstalled on your computer and also is available for download at:

<http://www.lenovo.com/diags>

**Notes:**

- If you are using another Windows® operating system rather than the Windows 7, you can find the latest information about diagnostics for your computer at:  
<http://www.lenovo.com/diagnose>
- If you are unable to isolate and repair the problem yourself after running Lenovo Solution Center, save and print the log files created by the program. You need the log files when you speak to a Lenovo technical support representative.

Lenovo Solution Center enables you to troubleshoot and resolve computer problems. It combines diagnostic tests, system information collection, security status, and support information, along with hints and tips for optimal system performance.

When you are setting up your computer, the Lenovo Solution Center program prompts you to create recovery media. You can use the recovery media to restore the storage drive to the factory default settings.

For additional information, see the Lenovo Solution Center help system.

### **Diagnosing problems with Lenovo Companion on the Windows 10 operating system**

Lenovo Companion is preinstalled on your computer and also is available for download at:

<https://shop.lenovo.com/us/en/accessories/software/apps/lenovo-apps/companion/>

**Note:** If you are unable to isolate and repair the problem yourself after running Lenovo Companion, save and print the log files created by the program. You need the log files when you speak to a Lenovo technical support representative.

Lenovo Companion supports the hardware scan function. It combines diagnostic tests, system information collection, security status, and support information, along with hints and tips for optimal system performance.

The troubleshooting information or the diagnostic programs might tell you that you need additional or updated device drivers or other software. You can get the latest technical information and download device drivers and updates from the Lenovo Support Web site at:

<http://www.lenovo.com/support>

For additional information, see the Lenovo Companion help system.

## **Quick test programs**

Run quick test programs to troubleshoot and resolve computer problems, especially when the computer does not have the Lenovo Solution Center program installed.

To download and install a quick test program, go to <http://www.lenovo.com/diags>, and follow the instructions on the Web site.

To run a test using quick test program, do the following:

1. Go to the C:\SWTOOLS\ldiag directory.
2. Double-click the gui\_lsc\_lite.exe file.
3. When the **User Account Control** window opens, click **Yes**.
4. Select the device class to be tested.
5. Select the devices to be tested.
6. Select the test to be performed.
7. Follow the instructions on the screen to start the test. When a problem is detected, information messages are displayed. Refer to the messages to troubleshoot the problem.

## **UEFI diagnostic program**

A UEFI diagnostic program is preinstalled on the computer. It enables you to test memory modules and internal storage devices, view system information, and check and recover bad sectors on internal storage devices.

To run the UEFI diagnostic program, do the following:

1. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 27, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 39 for error code descriptions and troubleshooting hints.
2. When the logo screen is displayed, repeatedly press and release the F10 key. The main screen of the UEFI diagnostic program is displayed.
3. Follow the instructions on the screen to use the diagnostic program.

The options on the main screen are as follows:

Table 1. Items on the main screen of the UEFI diagnostic program

Tests	Tools
<ul style="list-style-type: none"><li>• Quick Memory Test</li><li>• Quick Storage Device Test</li><li>• LCD test</li><li>• PCI-e test</li><li>• Exit Application</li></ul>	<ul style="list-style-type: none"><li>• System Information</li><li>• Generate configuration file</li><li>• Execute from configuration file</li><li>• Recover Bad Sectors Tool*</li></ul>

\* Recover Bad Sectors Tool is only available on computers that have hard disk drives installed.

## Bootable diagnostic programs

If the computer you are servicing is not installed with the UEFI diagnostic program, you can download a bootable diagnostic program from the Lenovo Support Web site. The bootable diagnostic programs enable you to test computer memory and internal storage devices, view system information, and check and recover the internal storage devices. To use the bootable diagnostic programs, you can create a bootable diagnostic medium on a Universal Serial Bus (USB) device or CD.

To create a bootable diagnostic medium, do the following:

1. Go to <http://www.lenovo.com/diags>.
2. Click **Lenovo Bootable Diagnostics**.
3. Follow the instructions on the Web site to create a bootable diagnostic medium on a USB device or CD.

To use the diagnostic medium you have created, do one of the following:

- If you have created the bootable diagnostic medium on a USB device, do the following:
  1. Attach the USB device to the computer.
  2. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 27, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 39 for error code descriptions and troubleshooting hints.
  3. When the logo screen is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
  4. Use the arrow keys to select **USB HDD** and then press Enter. The diagnostic program will be launched automatically.
  5. Follow the instructions on the screen to use the diagnostic program.
- If you have created the bootable diagnostic medium on a CD, do the following:
  1. Turn on the computer. If the computer cannot be turned on, go to “Power system checkout” on page 27, and check the power sources. If an error code is displayed, go to “Symptom-to-FRU index” on page 39 for error code descriptions and troubleshooting hints.
  2. Connect an external optical drive to the computer, and insert the CD into the optical drive.

3. Restart the computer.
4. When the logo screen is displayed, repeatedly press and release the F12 key. When the Boot Menu window opens, release the F12 key.
5. Use the arrow keys to select **ATAPI CDx** (x: 0, 1, ...) and then press Enter. The diagnostic program will be launched automatically.
6. Follow the instructions on the screen to use the diagnostic program.

## Power system checkout

To verify if a battery pack or an ac power adapter is functional, do the following:

1. Turn off the computer.
2. Connect the ac power adapter.
3. Turn on the computer. If the computer can be turned on, it means that either the battery pack or the ac power adapter is functional.
4. Insert a straightened paper clip into the emergency-reset hole to reset the computer. If the computer is still powered on, it means that the ac power adapter is functional.
5. Turn off the computer.
6. Disconnect the ac power adapter and turn on the computer. If the computer can be turned on, it means that the battery pack is functional.

If you suspect a power problem, see the appropriate one of the following power supply checkouts:

- “Checking the ac power adapter” on page 27
- “Checking the external battery pack and the operational charging” on page 28
- “Checking the coin-cell battery” on page 28

## Checking the ac power adapter

You are here because the computer fails only when the ac power adapter is used.

- If the power problem occurs only when the docking station or the port replicator is used, replace the docking station or the port replicator.
- If the system-status indicator does not blink three times when an ac power source is connected, check the power cord of the ac power adapter for correct continuity and installation.
- If the computer does not charge during operation, go to “Checking the external battery pack and the operational charging” on page 28.

To check the ac power adapter, do the following:

1. Unplug the ac power adapter cable from the computer.
2. Measure the output voltage at the plug of the ac power adapter cable. See the following illustration:

Pin	Voltage (V dc)
1	+20
2	0
3	Ground

**Note:** Output voltage of pin 2 of the ac power adapter might differ from the one you are servicing.

3. If the voltage is not correct, replace the ac power adapter.
4. If the voltage is acceptable, replace the system board.

**Note:** Noise from the ac power adapter does not always indicate a defect.

## Checking the external battery pack and the operational charging

### Checking the external battery pack

This computer supports only batteries specially designed for this specific system and manufactured by Lenovo or an authorized builder. The system does not support unauthorized batteries or batteries designed for other systems. If an unauthorized battery or a battery designed for another systems is installed, the system will not charge.

**Attention:** Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.

Move your pointer to the battery-status icon in the Windows notification area to check the battery status. The battery-status icon displays the percentage of battery power remaining and how long you can use your computer before you must charge the battery.

**Note:** If the external battery pack becomes hot, it may not be able to charge. Remove it from the computer and leave it at room temperature for a while. After it cools down, reinstall and recharge it.

To check the external battery pack, do the following:

1. Turn off the computer.
2. Remove the external battery pack and measure the voltage between battery terminals 1 (+) and 7 (-). See the following figure:

Terminal	Voltage (V dc)
1, 2	+ 0 to + 12.6
6, 7	Ground (-)

3. If the voltage is less than +11.0 V dc, the external battery pack has been discharged.  
If the voltage is still less than +11.0 V dc after recharging, replace the external battery pack.
4. If the voltage is more than +11.0 V dc, measure the resistance between battery terminals 5 and 7. The resistance must be 4 to 30 K  $\Omega$ . If the resistance is not correct, replace the external battery pack. If the resistance is correct, replace the system board.

### Checking the operational charging

To check whether the battery pack charges properly during operation, do the following:

1. Discharge the battery pack until the remained battery power is less than 50%.
2. Connect the computer to ac power to charge the battery pack. If the battery status icon in the Windows notification area indicates that the battery pack is not charging, remove the battery pack and let it return to room temperature.
3. Reinstall the battery pack. If the battery pack is still not charging, replace the battery pack.
4. Check the battery status icon again. If the same error still exists, replace the system board.

### Checking the coin-cell battery

To check the coin-cell battery, do the following:

1. Remove the coin-cell battery. See "1130 Coin-cell battery" on page 81.
2. Measure the voltage of the coin-cell battery. See the following illustration.

Wire	Voltage (V dc)
Red	+2.5 to +3.2
Black	Ground

- If the voltage is correct, replace the system board.
- If the voltage is not correct, replace the coin-cell battery.
- If the coin-cell battery discharges quickly after replacement, replace the system board.

---

## Chapter 4. Related service information

This chapter presents following information:

- “Restoring the factory contents with the Recovery Disc Set for the Windows 7 operating system” on page 31
- “Recovery information for the Windows 7 operating system” on page 32
- “Recovery information for the Windows 10 operating system” on page 34
- “Passwords” on page 36
- “Power management” on page 37
- “Symptom-to-FRU index” on page 39

**Service Web site:** When the latest maintenance diskette and the system program service diskette become available, they will be posted on <http://www.lenovo.com/support>

---

### Recovery information

This section provides information about recovery solutions. There are various methods to choose from when considering how to recover in the event of a software- or hardware-related problem. Recovery methods vary depending on the type of operating system that is installed. Ensure that you follow the correct recovery procedures.

### Restoring the factory contents with the Recovery Disc Set for the Windows 7 operating system

When the main storage drive is replaced because of a failure, no product recovery program is on the new drive. In this case, the customer must use the Recovery Disc Set to recover the computer. Order the Recovery Disc Set and the drive at the same time so that the customer can restore the computer to the factory default settings by using the Recovery Disc Set after the new drive is installed. For information about which discs to order, go to <http://www.lenovo.com/serviceparts-lookup>.

Depending on the model, the number of recovery discs included in the Recovery Disc Set differs. The Recovery Disc Set might consist of the user instructions and the following set of DVDs to restore the computer to the original factory configuration.

- *Operating System Recovery Disc* (one disc): This disc restores the Microsoft® Windows operating system. Use this disc to start the recovery process.
- *Applications and Drivers Recovery Disc* (one or more discs): This disc restores the preinstalled applications and drivers on the computer.
- *Supplemental Recovery Disc*: This disc contains additional content, such as updates to the software that was preinstalled on the computer. Not all recovery disc sets come with a *Supplemental Recovery Disc*.

#### Notes:

- You must have a DVD drive to use the recovery discs. If you do not have an internal DVD drive, you can use an external USB DVD drive.
- During the recovery process, all data on the drive will be deleted. If possible, copy any important data or personal files that you want to keep onto removable media or a network drive before you start the recovery process.
- Recovery can take one to two hours to complete. The length of time depends on the method you use. If you use recovery discs, the recovery process will take about two hours.

To restore the computer to the original factory configuration using the Recovery Disc Set, do the following:

1. Make the CD/DVD drive the first startup device in the startup sequence using the following procedure:
  - a. Press and hold down the F1 key, and then turn on the computer. When the logo screen is displayed or when you hear repeating beeps, release the F1 key. The ThinkPad Setup program opens.
  - b. Use the arrow keys to select **Startup → Boot**.
  - c. Select the CD/DVD drive as the **1st Boot Device**.
2. Insert the *Operating System Recovery Disc* into the DVD drive.
3. Press F10 to save the ThinkPad Setup program configuration changes. Follow the instructions on the screen to begin the recovery process.
4. Select your language and click **Next**.
5. Read the license. If you agree with the terms and conditions, select **I accept these terms and conditions** and then click **Next**. If you do not agree with the terms and conditions, follow the instructions on the screen.
6. Click **Yes** in the displayed window to begin the operating system recovery process.
7. Insert the *Applications and Drivers Recovery Disc* when prompted and then click **OK** to begin the process of recovering applications and drivers.
8. If you have a *Supplemental Recovery Disc*, insert it when prompted and click **Yes**. If you do not have a *Supplemental Recovery Disc*, click **No**.
9. When all of the data has been copied from the last disc in the set and has been processed, remove the disc and restart the computer.

**Note:** The rest of the recovery process is fully automated and no action from you is required. The computer will restart into the Microsoft Windows desktop several times and you might experience periods when no activity is apparent on the screen for several minutes at a time. This is normal.

10. When the recovery process is complete, the Set Up Windows screen is displayed. Follow the instructions on the screen to complete the Windows setup.
11. After you have completed the Windows setup, you might want to restore the original startup sequence. Start the ThinkPad Setup program and then press F9 to restore the default settings. Press F10 to save changes and exit the ThinkPad Setup program.

**Note:** After restoring a drive to the factory default settings, you might need to reinstall some device drivers.

## Recovery information for the Windows 7 operating system

This topic introduces the Lenovo recovery solutions on the Windows 7 operating system.

### Creating and using recovery media

Recovery media enables you to restore the storage drive to the factory default settings after all other recovery methods have failed. It is important to create recovery media as early as possible.

**Note:** The recovery operations you can perform using recovery media vary depending on the operating system from which the recovery media were created. The recovery media might contain a boot medium and a data medium. Your Microsoft Windows license permits you to create only one data medium. Ensure that you store the recovery media in a safe place after you have made them.

If you did not create recovery media as a precautionary measure, you can contact Lenovo Customer Support Center and purchase a set of recovery media from Lenovo. For a list of the Lenovo Support phone numbers for your country or region, go to:

<http://www.lenovo.com/support/phone>

The data on the recovery media can be used only for the following purposes:

- Reinstalling the programs and device drivers on your computer

- Reinstalling the operating system
- Modifying the data files on the hard disk drive using the additional files

### Creating recovery media

To create recovery media, you need a set of discs or a USB storage device (with at least 16 GB of storage capacity). The actual disc number or USB capacity that is required depends on the size of the recovery image.

**Attention:** Creating recovery media will delete anything stored on the discs or USB storage device. To avoid data loss, make a backup copy of all the data that you want to keep.

To create recovery media, click **Start → All Programs → Lenovo PC Experience**. In the prompted window, double-click **Lenovo Tools → Factory Recovery Disks**. Then, follow the instructions on the screen.

### Using recovery media

**Attention:** During the recovery process, all the files currently on the storage device of your computer will be deleted and replaced by the factory default settings.

To use the recovery media, do the following:

- If you have created the recovery media with discs, do the following:
  1. If your computer does not have an internal optical drive, connect an external optical drive to the computer.
  2. Turn on the computer and repeatedly press F12 until the Boot Menu window opens.
  3. In the Boot Menu window, select the optical drive (internal or external) as the first boot device. Then, insert the discs into the optical drive and press Enter. The recovery process starts.
  4. Follow the instructions on the screen to complete the operation.
- If you have created the recovery media with a USB storage device, do the following:
  1. Attach the USB storage device to one of the USB connectors on your computer.
  2. Turn on the computer and repeatedly press F12 until the Boot Menu window opens.
  3. In the Boot Menu window, select the USB storage device as the first boot device and press Enter. The recovery process starts.
  4. Follow the instructions on the screen to complete the operation.

**Note:** After restoring your computer to the factory default settings, you might have to reinstall the device drivers for some devices.

## Reinstalling preinstalled programs and device drivers

Your computer enables you to reinstall preinstalled programs and device drivers.

### Reinstalling preinstalled programs

To reinstall programs preinstalled on your computer, do the following:

1. Turn on your computer.
2. Go to C:\swttools.
3. Open the apps folder. The folder contains several subfolders named for various preinstalled programs.
4. Open the subfolder and locate the EXE file.
5. Double-click the EXE file and follow the instructions on the screen to complete the installation.

## Reinstalling preinstalled device drivers

**Attention:** Reinstalling device drivers will change the current configuration of your computer. Reinstall device drivers only when it is necessary to solve a problem with your computer.

To reinstall a device driver for a factory-installed device, do the following:

1. Turn on your computer.
2. Go to C:\swtools.
3. Open the Drivers folder and locate the subfolder that is named after the factory-installed device in your computer, such as AUDIO or VIDEO.
4. Open the subfolder for the device.
5. Reinstall the device driver by one of the following methods:
  - If the device subfolder contains an EXE file, double-click the EXE file and follow the instructions on the screen to complete the installation.
  - If the device subfolder contains a readme TXT file, the device driver installation information is included in the readme file. Follow the instructions to complete the installation.
  - If the device subfolder contains an INF file, right-click the INF file and select **Install**. Then follow the instructions on the screen to complete the installation.

If you need updated device drivers for your computer, download and install them from the Lenovo Support Web site at:

<http://www.lenovo.com/support>

## Recovery information for the Windows 10 operating system

This topic provides information about the Windows recovery solutions on the Windows 10 operating system.

### Resetting your computer

If your computer does not perform well, you might consider resetting your computer. In the resetting process, you can choose to keep your files or remove them, and then reinstall the Windows operating system.

To reset your computer, do the following:

**Note:** The items in the graphical user interface (GUI) might change without notice.

1. Open the Start menu, and then click **Settings** → **Update & security** → **Recovery**.
2. In the **Reset this PC** section, click **Get started**.
3. Follow the instructions on the screen to reset your computer.

### Using advanced startup options

The advanced startup options enable you to do the following:

- Change the firmware settings of the computer
- Change the startup settings of the Windows operating system
- Start the computer from an external device
- Restore the Windows operating system from a system image

To use advanced startup options, do the following:

**Note:** The items in the graphical user interface (GUI) might change without notice.

1. Open the Start menu, and then click **Settings → Update & security → Recovery**.
2. In the **Advanced startup** section, click **Restart now → Troubleshoot → Advanced options**.
3. Select a startup option you want, and then follow the instructions on the screen.

## Recovering your operating system if Windows 10 fails to start

The Windows recovery environment on your computer operates independently from the Windows 10 operating system. It enables you to recover or repair the operating system even if the Windows 10 operating system fails to start.

After two consecutive failed boot attempts, the Windows recovery environment starts automatically. Then you can choose repair and recovery options by following the on-screen instructions.

**Note:** Ensure that your computer is connected to ac power during the recovery process.

## Creating and using a recovery USB drive

You can create a recovery USB drive as a backup for the Windows recovery programs. With the recovery USB drive, you can troubleshoot and fix the problems even if the preinstalled Windows recovery programs are damaged.

It is recommended that you create a recovery USB drive as early as possible. If you did not create a recovery USB drive as a precautionary measure, you can contact Lenovo Customer Support Center and purchase one from Lenovo. For a list of the Lenovo Support phone numbers for your country or region, go to:

<http://www.lenovo.com/support/phone>

### Creating a recovery USB drive

To create a recovery USB drive, you need a USB drive with at least 16 GB of storage capacity. The actual USB capacity that is required depends on the size of the recovery image.

**Attention:** The creation process will delete anything stored on the USB drive. To avoid data loss, make a backup copy of all the data that you want to keep.

To create a recovery USB drive, do the following:

**Note:** Ensure that your computer is connected to ac power during the following process.

1. Connect a proper USB drive (at least 16 GB of storage) to the computer.
2. Type *recovery* in the search box on the taskbar. Then click **Create a recovery drive**.
3. Click **Yes** in the User Account Control window to allow the Recovery Media Creator program to start.
4. In the Recovery Drive window, follow the instructions on the screen to create a recovery USB drive.

### Using the recovery USB drive

If you cannot start your computer, use the recovery USB drive to recover your computer.

To use a recovery USB drive, do the following:

**Note:** Ensure that your computer is connected to ac power during the following process.

1. Connect the recovery USB drive to the computer.
2. Turn on or restart the computer. Before the Windows operating system starts, repeatedly press F12. The Boot Menu window opens.
3. Select the recovery USB drive as the boot device.
4. Select a preferred keyboard layout.

5. Click **Troubleshoot** to display optional recovery solutions.
6. Select a corresponding recovery solution according to your situation. Then follow the instructions on the screen to complete the process.

---

## Passwords

As many as three passwords may be needed for any ThinkPad notebook computer: the power-on password, the hard disk password, and the supervisor password.

If any of these passwords has been set, a prompt for it will be displayed on the screen whenever the computer is turned on. The computer does not start until the password is entered.

**Note:** If only a supervisor password is set, the password prompt will not be displayed when the operating system is started.

### Power-on password

A power-on password protects the system from being powered on by an unauthorized person. The password must be entered before an operating system can be started. For instructions on how to remove the power-on password, see “How to remove the power-on password” on page 36.

### Hard disk password

There are two kinds of hard disk passwords:

- User hard disk password - for the user
- Master hard disk password - for the system administrator, who can use it to get access to the hard disk even if the user has changed the user hard disk password

**Note:** There are two modes for the hard disk password: **User only** and **Master + User**. The **Master + User** mode requires two hard disk passwords; the system administrator enters both in the same operation. The system administrator then provides the user hard disk password to the system user.

**Attention:** If the user hard disk password has been forgotten, check whether a master hard disk password has been set. If it has, it can be used for access to the hard disk drive. If no master hard disk password is available, neither Lenovo nor Lenovo authorized service technicians provide any services to reset either the user or the master hard disk password, or to recover data from the hard disk drive. The hard disk drive can be replaced for a scheduled fee.

For how to remove the hard disk password, see “How to remove the hard disk password” on page 37.

### Supervisor password

A supervisor password protects the system information stored in the ThinkPad Setup. The user must enter the supervisor password in order to get access to the ThinkPad Setup and change the system configuration.

**Attention:** If the supervisor password has been forgotten and cannot be made available to the service technician, there is no service procedure to reset the password. The system board must be replaced for a scheduled fee.

### How to remove the power-on password

To remove a power-on password, do the following:

If no supervisor password has been set, do the following to remove the power-on password:

1. Turn off the computer.

2. Remove the external battery pack. For instructions on how to remove the external battery pack, see “1020 External battery pack” on page 68.
3. Remove the coin-cell battery. For instructions on how to remove the coin-cell battery, see “1130 Coin-cell battery” on page 81. Wait for a few seconds.
4. Reinstall the coin-cell battery. For instructions on how to install the coin-cell battery, see “1130 Coin-cell battery” on page 81.
5. Reinstall the external battery pack. For instructions on how to install the external battery pack, see “1020 External battery pack” on page 68.
6. Turn on the computer and wait until the power-on self-test (POST) ends. After the POST ends, the password prompt does not appear. The power-on password has been removed.

If a supervisor password has been set and is known to the service technician, do the following to remove the power-on password:

1. Turn on the computer.
2. When the logo screen comes up, immediately press F1.
3. Type the supervisor password to enter the ThinkPad Setup program.
4. Select **Security**.
5. Select **Password**.
6. Select **Power-On Password**.
7. Type the current supervisor password in the **Enter Current Password** field. then leave the **Enter New Password** field blank, and press Enter twice.
8. In the Changes have been saved window, press Enter.
9. Press F10 to save changes and exit the ThinkPad Setup program.

## How to remove the hard disk password

**Attention:** If **User only** mode is selected and the user hard disk password has been forgotten and cannot be made available to the service technician, neither Lenovo nor Lenovo authorized service technicians provide any services to reset the user hard disk passwords or to recover data from the hard disk drive. To put the system back to operational status, the only Lenovo and Lenovo-authorized service solution would be to replace the hard disk drive or solid-state drive with a scheduled fee.

To remove a user hard disk password that has been forgotten, when the supervisor password and master hard disk password are known, do the following:

1. Turn on the computer.
2. When the logo screen comes up, immediately press F1 to enter the ThinkPad Setup program.
3. Select **Security**.
4. Select **Password**.
5. Select **Hard disk x password**, where *x* is the letter of the hard disk drive. A pop-up window opens.
6. Select **Master hard disk password**.
7. Type the current master hard disk password in the **Enter Current Password** field. Then leave the **Enter New Password** field blank, and press Enter twice.
8. Press F10 to save changes and exit the ThinkPad Setup program. The user hard disk password and the master hard disk password have been removed.

---

## Power management

To reduce power consumption, the computer has three power management modes: screen blank, sleep, and hibernation.

## Screen blank mode (for the Windows 7 operating system only)

If the time set on the “Turn off monitor” timer in the operating system expires, the LCD backlight turns off.

To put the computer into screen blank mode, do the following:

1. Right-click the battery status indicator on the taskbar.
2. Select **Power off display**.

To end screen blank mode and resume normal operation, press any key.

## Sleep mode

When the computer enters sleep mode, the following events occur in addition to what occurs in screen blank mode:

- The LCD is powered off.
- The hard disk drive or solid-state drive is powered off.
- The microprocessor stops.

To put your computer into sleep mode, do the following:

- **For Windows 7:** Open the Start menu, then click the arrow next to the **Shut down** button. Click **Sleep** from the menu displayed.
- **For Windows 10:** Open the Start menu, click  **Power**, and then click **Sleep**.

In certain circumstances, the computer goes into sleep mode automatically:

- After a period of inactivity specified in power plan settings
- When the battery power is low

## Hibernation mode

In hibernation mode, the following occurs:

- The system status, random access memory (RAM), video random access memory (VRAM), and setup data are stored on the hard disk drive or solid-state drive.
- The system is powered off.

**Note:** If the computer enters the hibernation mode while it is docked to the docking station or the port replicator, do not undock it before resuming normal operation. If you do undock it and then try to resume normal operation, you will get an error message, and you will have to restart the system.

If you have defined one of the following actions as the event that causes the system to go into hibernation mode, perform that action.

- Closing the lid.
- Pressing the power button.

Also, the computer goes into hibernation mode automatically after a period of inactivity specified in power plan settings.

When the power is turned on, the computer returns from hibernation mode and resumes operation. The hibernation file in the boot record on the hard disk drive or solid-state drive is read, and system status is restored from the hard disk drive or solid-state drive.

---

## Symptom-to-FRU index

This section contains following information:

- “Error messages” on page 39
- “Beep errors” on page 41
- “No-beep symptoms” on page 42
- “LCD-related symptoms” on page 42
- “Intermittent problems” on page 43
- “Undetermined problems” on page 43

The symptom-to-FRU index in this section lists symptoms and errors and their possible causes. The most likely cause is listed first, in boldface type.

**Note:** Do the FRU replacement or other actions in the sequence shown in the column headed “FRU or action, in sequence.” If replacing a FRU does not solve the problem, put the original part back in the computer. Do not replace a nondefective FRU.

This index can also help you determine, during regular servicing, what FRUs are likely to need to be replaced next.

A numeric error is displayed for each error detected in POST or system operation. In the displays, **n** can be any number.

If no numeric code is displayed, check the narrative descriptions of symptoms. If the symptom is not described there, go to “Intermittent problems” on page 43.

**Note:** For a device not supported by diagnostic codes in the ThinkPad notebook computers, see the manual for that device.

## Error messages

- **Message:** 0177: Bad SVP data, stop POST task.  
**Solution:** Checksum of the supervisor password in the EEPROM is not correct. The system board should be replaced. Have the computer serviced.
- **Message:** 0183: Bad CRC of Security Settings in EFI Variable. Enter ThinkPad Setup.  
**Solution:** Checksum of the Security settings in the EFI Variable is not correct. Enter ThinkPad Setup to check security settings, press F10, and then press Enter to restart the system. If you still have a problem, have the computer serviced.
- **Message:** 0187: EAIA data access error.  
**Solution:** The access to EEPROM is failed. Have the computer serviced.
- **Message:** 0188: Invalid RFID Serialization Information Area.  
**Solution:** The EEPROM checksum is not correct (block # 0 and 1). The system board should be replaced, and the box serial number must be reinstalled. Have the computer serviced.
- **Message:** 0189: Invalid RFID configuration information area.  
**Solution:** The EEPROM checksum is not correct (block # 4 and 5). The system board should be replaced, and the universally unique identifier (UUID) must be reinstalled. Have the computer serviced.
- **Message:** 0190: Critical low-battery error.  
**Solution:** The computer turned off because the battery power is low. Connect the ac power adapter to the computer and charge the batteries.
- **Message:** 0191: System Security - Invalid remote change requested.

**Solution:** The system configuration change has failed. Confirm the operation and try again. To clear the error, enter ThinkPad Setup.

- **Message:** 0199: System Security - Security password retry count exceeded.

**Solution:** This message is displayed if you enter a wrong supervisor password more than three times. Confirm the supervisor password and try again. To clear the error, enter ThinkPad Setup.

- **Message:** 0270: Real Time Clock Error.

**Solution:** System Real Time Clock is not functional. Have the computer serviced.

- **Message:** 0271: Check Date and Time settings.

**Solution:** The date or the time is not set in the computer. Enter ThinkPad Setup and set the date and time.

- **Message:** 1802: Unauthorized network card is plugged in - Power off and remove the network card.

**Solution:** The wireless network card is not supported on this computer. Remove it.

- **Message:** 1820: More than one external fingerprint readers are attached.

**Solution:** Turn off and remove all but the reader that you set up within your main operating system.

- **Message:** 2000: ThinkVantage Active Protection sensor diagnostics failed.

**Solution:** ThinkVantage Active Protection sensor is not working correctly. Have the computer serviced.

- **Message:** 2101: Detection error on HDD0 (Main HDD).

**Solution:** The hard disk drive is not working. Have the hard disk drive serviced.

- **Message:** 2102: Detection error on SSD (M.2).

**Solution:** The M.2 solid-state drive is not working. Have the M.2 solid-state drive serviced.

- **Message:** 2111: Read error on HDD0 (Main HDD).

**Solution:** The hard disk drive is not working. Have the hard disk drive serviced.

- **Message:** 2112: Read error on SSD (M.2).

**Solution:** The M.2 solid-state drive is not working. Have the M.2 solid-state drive serviced.

- **Message:** 2200: Machine Type and Serial Number are invalid.

**Solution:** Machine Type and Serial Number are invalid. Have the computer serviced.

- **Message:** 2201: Machine UUID is invalid.

**Solution:** Machine UUID is invalid. Have the computer serviced.

- **Message:** Fan error.

**Solution:** Cooling fan has failed. Shut down the computer immediately and have the computer serviced.

- **Message:** Thermal sensing error.

**Solution:** The thermal sensor has a problem. Shut down the computer immediately and have the computer serviced.

- **Message:** Error: The non-volatile system UEFI variable storage is nearly full.

**Note:** This error indicates that the operating system or programs cannot create, modify, or delete data in the non-volatile system UEFI variable storage due to insufficient storage space after POST.

The non-volatile system UEFI variable storage is used by the UEFI BIOS and by the operating system or programs. This error occurs when the operating system or programs store large amounts of data in the variable storage. All data needed for POST, such as BIOS setup settings, chipset, or platform configuration data, are stored in a separate UEFI variable storage.

**Solution:** Press F1 after the error message is displayed to enter ThinkPad Setup. A dialog asks the user for confirmation to clean up the storage. If the user selects “Yes”, all data that were created by the operating system or programs will be deleted except global variables defined by the Unified Extensible

Firmware Interface Specification. If the user selects “No”, all data will be kept, but the operating system or programs will not be able to create, modify, or delete data in the storage.

If this error happens at a service center, Lenovo authorized service personnel will clean up the non-volatile system UEFI variable storage using the preceding solution.

- **Message:** This system does not support batteries that are not genuine Lenovo-made or authorized. The system will continue to boot, but may not charge unauthorized batteries.

**Attention:** Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.

Press the ESC key to continue.

**Solution:** Replace the battery with the correct Lenovo battery for this computer. If you still see the same error message, contact Lenovo service to have the computer serviced.

- **Message:** The battery installed is not supported by this system and will not charge. Please replace the battery with the correct Lenovo battery for this system. Press the ESC key to continue.

**Solution:** Replace the battery with the correct Lenovo battery for this computer. If you still see the same error message, contact Lenovo service to have the computer serviced.

- **Message:** The battery installed is not supported by this system and will not charge. Please replace the battery with the correct Lenovo battery for this system. Press the ESC key to continue.

**Solution:** Replace the battery with the correct Lenovo battery for this computer. If you still see the same error message, contact Lenovo service to have the computer serviced.

## Beep errors

Lenovo SmartBeep technology enables you to decode beep errors with your smartphone when a black screen occurs with beeps from your computer. To decode the beep error with Lenovo SmartBeep technology, do the following:

1. Go to <http://www.support.lenovo.com/smartbeep> or scan the following QR Code.

2. Download the proper diagnostic app and install it on your smartphone.
3. Run the diagnostic app and place the smartphone near the computer.
4. Press the Fn key on your computer to emit the beep again. The diagnostic app decodes the beep error and shows possible solutions on the smartphone.

The following section describes some beep errors and the corresponding solutions.

**Note:** Do not attempt to service a product yourself unless instructed to do so by the Customer Support Center or product documentation. Only use a Lenovo-authorized service provider to repair your product.

Error codes	Solutions
0001: Reset error (platform reset not de-asserted)	<ol style="list-style-type: none"> <li>1. Remove all power resources (the ac power adapter, removable battery, and coin-cell battery). Wait for one minute. Then reconnect all power resources.</li> <li>2. Replace the system board (service provider only).</li> </ol>
0002: Internal bus error	Replace the system board (service provider only).
0281: General embedded controller error	Replace the system board (service provider only).
0282: Memory module error	<ol style="list-style-type: none"> <li>1. Reinstall or replace the memory module.</li> <li>2. Replace the system board (service provider only).</li> </ol>
0283: PCI resource error	<ol style="list-style-type: none"> <li>1. Remove PCIe devices (the M.2 card, PCIe card, and so on) (service provider only).</li> <li>2. Replace the system board (service provider only).</li> </ol>
0284: TCG-compliant functionality-related error (might be the BIOS code validation failure)	Replace the system board (service provider only).
0285: TCG-compliant functionality-related error (might be the TPM initialization failure)	Replace the system board (service provider only).
0286: Integrated graphics error	Replace the system board (service provider only).
0287: Discrete graphics error	<ol style="list-style-type: none"> <li>1. Reinstall or replace the discrete graphics card (service provider only).</li> <li>2. Replace the system board (service provider only).</li> </ol>
0288: Computer display error	<ol style="list-style-type: none"> <li>1. Reconnect the display cable on both the system board side and the computer display side (service provider only).</li> <li>2. Replace the system board (service provider only).</li> </ol>

## No-beep symptoms

Table 2. No-beep symptoms

Symptom or error	FRU or action, in sequence
No beep, power-on indicator on, LCD blank, and no POST.	<ol style="list-style-type: none"> <li>1. <b>Ensure that every connector is connected tightly and correctly.</b></li> <li>2. Reseat memory module.</li> <li>3. Replace the system board.</li> </ol>
No beep, power-on indicator on, and LCD blank during POST.	<ol style="list-style-type: none"> <li>1. <b>Reseat memory module.</b></li> <li>2. Replace the system board.</li> </ol>
The power-on password prompt appears.	A power-on password or a supervisor password is set. Type the password and press <b>Enter</b> .
The hard disk password prompt appears.	A hard disk password is set. Type the password and press <b>Enter</b> .

## LCD-related symptoms

**Important:** The TFT LCD for the notebook computer contains many thin-film transistors (TFTs). The presence of a small number of dots that are missing, discolored, or always lighted is characteristic of TFT LCD technology, but excessive pixel problems can cause viewing concerns. If the LCD you are servicing has two or less visible defective pixels, it should not be considered faulty. However, if the LCD has three or more visible defective pixels, it will be deemed as defective by Lenovo and it should be replaced.

### Notes:

- This policy applies to all ThinkPad notebook computers purchased on 1 January, 2008 or later.
- Lenovo will not provide warranty replacement if the LCD is within specifications because we cannot guarantee that any replacement LCD will have zero pixel defects.
- One pixel consists of R, G, B sub-pixels.

Table 3. LCD-related symptoms

Symptom or error	FRU or action, in sequence
No beep, power-on indicator on, and a blank LCD during POST.	<b>Replace the system board.</b>
<ul style="list-style-type: none"> <li>• LCD backlight not working.</li> <li>• LCD too dark.</li> <li>• LCD brightness cannot be adjusted.</li> <li>• LCD contrast cannot be adjusted.</li> </ul>	<ol style="list-style-type: none"> <li>1. <b>Reseat the LCD cable.</b></li> <li>2. Replace the LCD unit.</li> <li>3. Replace the system board.</li> </ol>
<ul style="list-style-type: none"> <li>• LCD screen unreadable.</li> <li>• Characters missing pixels.</li> <li>• Screen abnormal.</li> <li>• Wrong color displayed.</li> </ul>	<ol style="list-style-type: none"> <li>1. <b>See important note for “LCD-related symptoms.”</b></li> <li>2. Reseat all LCD cable.</li> <li>3. Replace the LCD unit.</li> <li>4. Replace the system board.</li> </ol>
Horizontal or vertical lines displayed on LCD.	<b>Replace the LCD unit.</b>

## Intermittent problems

Intermittent system hang problems can be due to a variety of causes that have nothing to do with a hardware defect, such as cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a problem recurs.

When analyzing an intermittent problem, do the following:

1. Run the diagnostic test for the system board in loop mode **at least 10 times**.
2. If no error is detected, do not replace any FRUs.
3. If any error is detected, replace the FRU shown by the FRU code. Rerun the test to verify that no more errors exist.

## Undetermined problems

If the diagnostic tests did not identify the adapter or device that has failed, if wrong devices are installed, or if the system simply is not operating, follow these procedures to isolate the failing FRU (do not isolate FRUs that have no defects).

Verify that all attached devices are supported by the computer.

Verify that the power supply being used at the time of the failure is operating correctly. See “Power system checkout” on page 27.

1. Turn off the computer.
2. Visually check each FRU for damage. Replace any damaged FRU.
3. Remove or disconnect all of the following devices:
  - a. Non-ThinkPad devices
  - b. Devices attached to the docking station or the port replicator
  - c. Printer, mouse, and other external devices
  - d. Battery pack
  - e. Hard disk drive or solid-state drive
  - f. External diskette drive or optical drive
  - g. Memory module
  - h. PC cards
4. Turn on the computer.

5. Determine whether the problem has been solved.
6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
7. If the problem remains, replace the following FRUs one at a time (do not replace a nondefective FRU):
  - a. System board
  - b. LCD unit

## Chapter 5. Function keys

The following table describes the functions of function keys and key combinations.

Table 4. Function keys

Function key and key combination	Description
 F1	Mute or unmute the speakers.  If you mute the sound and turn off your computer, the sound will remain muted when you turn on your computer again. To turn on the sound, press  or  .
 F2	Decrease the speaker volume.
 F3	Increase the speaker volume.
 F4	Mute or unmute the microphones.
 F5	Darken the computer display.
 F6	Brighten the computer display.
 F7	Manage external displays.
 F8	Enable or disable the built-in wireless features.
 F9	<ul style="list-style-type: none"> <li>Windows 7: Open Control Panel.</li> <li>Windows 10: Open the Settings window.</li> </ul>
 F10	For Windows 10, enable or disable the built-in Bluetooth features.
 F11	Open a keyboard setting page.
 F12	<p>For Windows 10, the key invokes the function defined by yourself. If no function is defined, press this key to open the Cortana® personal assistant.</p> <p>To define or change the action for the F12 key, do the following:</p> <ol style="list-style-type: none"> <li>Open the Lenovo Settings program.</li> <li>Click the input icon .</li> <li>Locate the <b>KEYBOARD: USER-DEFINED KEY</b> section and follow the instructions on the screen to complete the setting.</li> </ol> <p>On the <b>Input</b> page, you can also define different functions for the key combinations with F12, such as Shift+F12, Alt+F12, or Ctrl+F12.</p>

Table 4. Function keys (continued)

Function key and key combination	Description
	<p>You can configure the Fn key and function keys in the Keyboard Properties window by doing the following:</p> <ol style="list-style-type: none"> <li>1. Go to Control Panel. Change the view of Control Panel from Category to Large icons or Small icons.</li> <li>2. Click <b>Keyboard</b>. In the Keyboard Properties window, click the <b>Fn and function keys</b> tab.</li> <li>3. Select the options of your preference.</li> </ol> <p>Press Fn+Esc to switch the key function between the standard F1–F12 function and the special function printed as an icon on each key. You can change the default function in the Keyboard Properties window.</p>
	<p>Open the Snipping Tool program.</p>
<p>Fn+B</p>	<p>This key combination has the same function as the Break key on a conventional external keyboard.</p>
<p>Fn+K</p>	<p>This key combination has the same function as the ScrLK or Scroll Lock key on a conventional external keyboard.</p>
<p>Fn+P</p>	<p>This key combination has the same function as the Pause key on a conventional external keyboard.</p>
<p>Fn+S</p>	<p>This key combination has the same function as the SysRq key on a conventional external keyboard.</p>
<p>Fn+4</p>	<p>Press Fn+4 to put the computer into sleep mode. To wake up the computer, press any key or the power button.</p>

---

## Chapter 6. Locations

This chapter introduces the locations of the hardware components on your computer.

---

### Computer controls, connectors, and indicators

This section introduces hardware features of the computer.

#### Front view

<b>1</b> Camera (available on some models)	<b>2</b> Microphones (available on some models)
<b>3</b> Power button	<b>4</b> Fingerprint reader (available on some models)
<b>5</b> Trackpad	<b>6</b> Media-card slot (available on some models)
<b>7</b> TrackPoint® pointing stick	<b>8</b> TrackPoint buttons

#### Left-side view

<b>1</b> ac power connector	<b>2</b> Fan louvers
<b>3</b> Always On USB 3.0 connector	<b>4</b> Combo audio connector
<b>5</b> Smart-card slot (available on some models)	

## Right-side view

<b>1</b> Micro-SIM-card tray (available on some models)	<b>2</b> USB 3.0 connectors
<b>3</b> Mini DisplayPort® connector	<b>4</b> Ethernet connector
<b>5</b> Video graphics array (VGA) connector	<b>6</b> Security-lock slot

## Bottom view

<b>1</b> Removable battery	<b>2</b> Docking station connector
<b>3</b> Keyboard drainage holes	<b>4</b> Speakers

## Status indicators

This topic provides information about locating and identifying the various status indicators on your computer.

**Note:** Depending on the model, your computer might look different from the following illustrations.

Indicator	Meaning
<b>1</b> Fn Lock indicator	This indicator shows the status of Fn Lock function. For more information, see Chapter 5 “Function keys” on page 45.
<b>2</b> Speaker-mute indicator	When this indicator is on, the speakers are muted.
<b>3</b> Microphone-mute indicator	When this indicator is on, the microphones are muted.
<b>4</b> Camera status indicator	When this indicator is on, the camera is in use.
<b>5 6</b> System status indicators	The indicator in the ThinkPad logo on the computer lid and the indicator in the power button show the system status of your computer. <ul style="list-style-type: none"> <li>• <b>Blinks for three times:</b> The computer is initially connected to power.</li> <li>• <b>On:</b> The computer is on (in normal mode).</li> <li>• <b>Off:</b> The computer is off or in hibernation mode.</li> <li>• <b>Blinks quickly:</b> The computer is entering sleep or hibernation mode.</li> <li>• <b>Blinks slowly:</b> The computer is in sleep mode.</li> </ul>

---

## Locating FRUs and CRUs

This topic introduces the following service parts:

- “Major FRUs and CRUs” on page 51
- “LCD FRUs” on page 54
- “Miscellaneous parts” on page 55

### Notes:

- FRUs refer to parts that must be installed or replaced only by trained service technicians. If customers choose to replace the FRUs by themselves, the product warranty might be affected.
- Each FRU is available for all types or models, unless otherwise specified.
- FRUs marked with **OP** are available as options.
- **CRU statement for customers:**

You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual can be found at <http://www.lenovo.com/support>. Follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

ThinkPad computers contain the following types of CRUs:

- **Self-service CRUs:** Refer to parts that can be installed or replaced easily by customer themselves or by trained service technicians at an additional cost.
- **Optional-service CRUs:** Refer to parts that can be installed or replaced by customers with a greater skill level. Trained service technicians can also provide service to install or replace the parts under the type of warranty designated for the customer’s machine.

## Major FRUs and CRUs

**Note:** Depending on the computer model, the keyboard bezel assembly **4** of your computer might look different from the illustration above.

Table 5. Major FRUs and CRUs

No.	FRU description	Self-service CRU	Optional-service CRU
<b>1</b>	LCD unit	No	No
<b>2</b>	Trackpad	No	No

Table 5. Major FRUs and CRUs (continued)

No.	FRU description	Self-service CRU	Optional-service CRU
<b>3</b>	Trackpad cable	No	No
<b>4</b>	Keyboard bezel assembly	No	No
<b>5</b>	Docking bracket	No	No
<b>6</b>	System board	No	No
<b>7</b>	VGA board	No	No
<b>8</b>	I/O bracket	No	No
<b>9a</b>	Internal storage drive (hard disk drive)*	No	Yes
<b>9b</b>	Internal storage drive (solid-state drive)*	No	Yes
<b>10</b>	Speaker assembly	No	Yes
<b>11</b>	Speaker rubbers	No	No
<b>12</b>	External battery pack	Yes	No
<b>13</b>	SIM-card tray*	Yes	No
<b>14</b>	SIM-card filler*	Yes	No
<b>15</b>	Lenovo factory recovery USB key*	Yes	No
<b>16</b>	Miscellaneous parts kits	Yes	No
<b>17</b>	Lenovo recovery disc set*	Yes	No
<b>18</b>	Power cord	Yes	No
<b>19</b>	ac power adapter	Yes	No
<b>20</b>	Base cover assembly	No	Yes
<b>21</b>	Keyboard rubbers	Yes	No
<b>22</b>	Memory module	No	Yes
<b>23</b>	Coin-cell battery	No	Yes
<b>24</b>	M.2 solid-state drive in the wireless-WAN-card slot	No	No
<b>25</b>	Wireless wide area network (WAN) card*	No	Yes
<b>26</b>	Wireless local area network (LAN) card	No	Yes
<b>27</b>	Smart-card bracket*	No	No
<b>28</b>	Smart-card cable*	No	No
<b>29</b>	Smart card reader*	No	No
<b>30</b>	Smart-card filler*	No	No
<b>31</b>	USB and audio board	No	No
<b>32</b>	Thermal fan assembly	No	No
<b>33</b>	dc-in cable	No	No
<b>34</b>	M.2 solid-state drive adapter in the hard disk drive bay*	Yes	No
<b>35</b>	M.2 solid-state drive in the hard disk drive bay*	Yes	No
<b>36</b>	Keyboard	No	Yes
<b>37</b>	TrackPoint cap <b>0P</b>	Yes	No

\* Available on some models

**Note:** The Lenovo factory recovery USB key **15** and the Lenovo recovery disc set **17** are used to restore the Microsoft Windows operating system. They might not come with the computer, and a user might order them from <http://www.lenovo.com/lenovorecovery>, though additional shipping and handling fees might apply.

# LCD FRUs

Table 6. LCD FRUs

No.	FRU descriptions	Self-service CRU	Optional-service CRU
1	LCD-bezel sheet	No	No
2	Camera/microphone module, camera module, or microphone module (available on some models)	No	No
3	LCD panel	No	No
4	Wireless-LAN/WAN antenna assembly or wireless-LAN antenna assembly	No	No
5	LCD hinges	No	No
6	LCD rear-cover assembly	No	No
7	LCD cable	No	No

## Miscellaneous parts

Table 7. Miscellaneous part

FRU descriptions	Self-service CRU	Optional-service CRU
Screw kit <ul style="list-style-type: none"> <li>• M2 x L4</li> <li>• M2 x L3</li> <li>• M2 x L5</li> <li>• M2 x L7</li> <li>• M2.5 x L2.5</li> <li>• M2.5 x L6</li> <li>• D4.7; H3.5</li> </ul>	No	No
Rubber kit	No	No

## Connector and cable guide

This section provides information to help Lenovo authorized service technicians identify connectors and cables for replacement purpose. To view each FRU and the exploded illustration of the computer, see “Major FRUs and CRUs” on page 51 and “LCD FRUs” on page 54.

**Note:** Depending on the model, some connectors or cables might not be available.

## System board connectors and cables

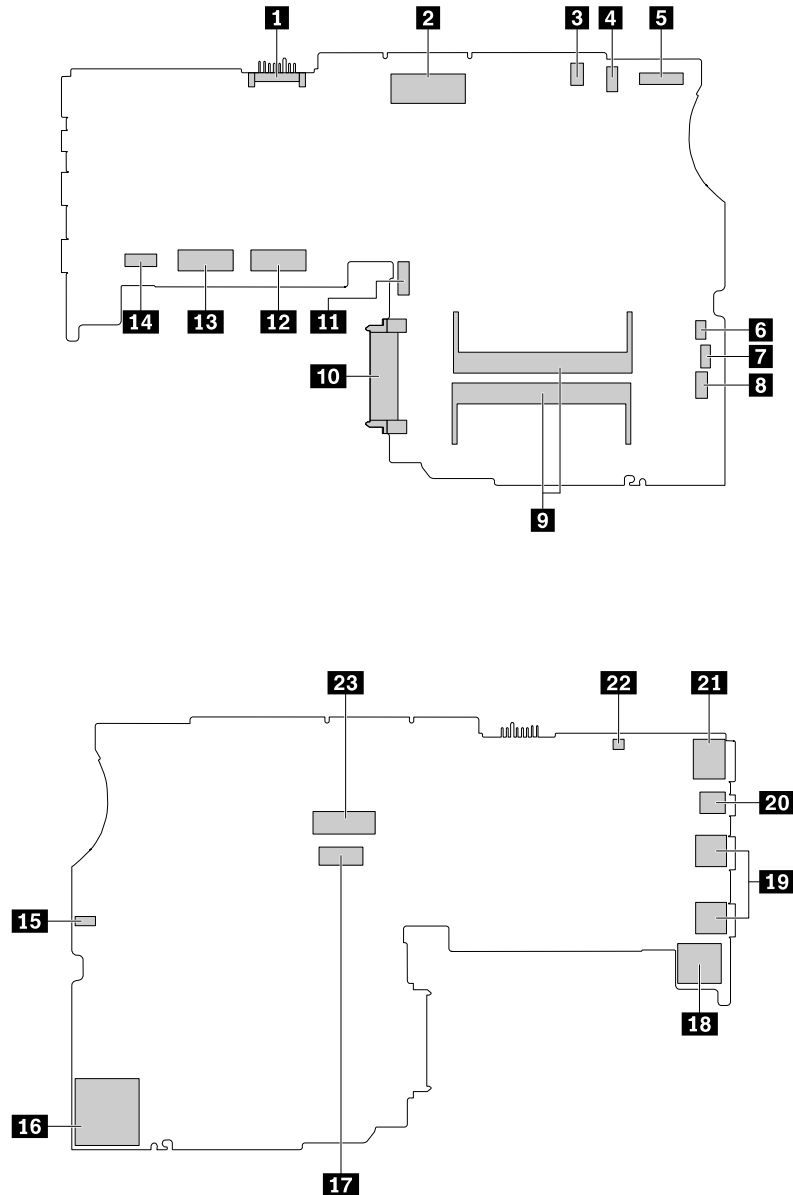

Table 8. System board

No.	Connector/feature	Internal cable required	Cable connection
<b>1</b>	Battery connector (internal)	No	Connect the removable battery directly to this connector.
<b>2</b>	Docking connector (internal)	No	Connect the supported docking station directly to this connector.
<b>3</b>	dc-in connector (internal)	dc-in cable	The power connector of the computer comes with a dc-in cable. Connect the cable to this connector.
<b>4</b>	Thermal fan connector (internal)	Thermal fan assembly cable	The thermal fan assembly comes with a cable. Connect the cable to this connector.

Table 8. System board (continued)

No.	Connector/feature	Internal cable required	Cable connection
5	Embedded DisplayPort connector (internal)	LCD cable	See “Camera/microphone card connector and LCD cable” on page 58.
6	Coin-cell battery connector (internal)	Coin-cell battery cable	The coin-cell battery comes with a cable. Connect the cable to this connector.
7	Smart card reader connector (internal)	Smart-card cable	Connect one end to the smart card reader and the other end to this connector.
8	Speaker assembly connector (internal)	Speaker assembly cable	The speaker assembly comes with a cable. Connect the cable to this connector.
9	Memory module slots (internal)	No	Insert the memory modules into these slots.
10	Hard disk drive/solid-state drive connector (internal)	No	Insert the hard disk drive or solid-state drive directly into this slot.
11	Trackpad connector (internal)	Trackpad cable	Connect one end to the trackpad and the other end to this connector.
12	Wireless-LAN card slot (internal)	No	Insert the wireless-LAN card into this slot.
13	Wireless-WAN card slot (internal)	No	Insert the wireless-WAN card into this slot.
14	Fingerprint reader card connector (internal)	Fingerprint reader card cable	The keyboard bezel assembly comes with a fingerprint reader card cable. Connect the cable to this connector.
15	USB and audio card connector (internal)	No	Connect the USB and audio card to the system board directly.
16	Media-card-slot connector (external)	No	Insert a flash media card into this slot.
17	TrackPoint pointing stick connector (internal)	TrackPoint pointing stick cable	The keyboard comes with a TrackPoint pointing stick cable. Connect the cable to this connector.
18	Micro-SIM-card slot (external)	No	If your computer supports the wireless WAN feature, insert a micro Subscriber Identification Module (SIM) card into this slot to establish wireless WAN connections.
19	USB 3.0 connectors (external)	No	Connect USB-compatible devices to these connectors.
20	Mini DisplayPort connector (external)	No	Connect a compatible projector, external monitor, or high-definition television to this connector.
21	Ethernet connector (external)	No	Connect the computer to a LAN through this connector.

Table 8. System board (continued)

No.	Connector/feature	Internal cable required	Cable connection
<b>22</b>	VGA card connector (internal)	No	Connect the VGA card to the system board directly.
<b>23</b>	Keyboard connector (internal)	Keyboard cable	The keyboard comes with a keyboard cable. Connect the cable to this connector.

**Camera/microphone card connector and LCD cable**

Table 9. Camera/microphone card

No.	Connector/feature	Internal cable required	Cable connection
<b>1</b>	Camera/microphone card connector (internal)	LCD cable	Connect the end <b>b</b> of the LCD cable to the A cover, and connect the end <b>c</b> to the LCD connector on the LCD panel. Then connect the end <b>d</b> to the LCD connector on the system board and the end <b>a</b> to this connector.

**dc-in cable**

Table 10. dc-in cable

No.	Connector/feature	Internal cable required	Cable connection
<b>1</b>	dc-in cable connector (internal)	dc-in cable	Connect this end to the dc-in connector on the system board.
<b>2</b>	ac adapter connector (external)	No	Connect the ac adapter to this connector.

### Keyboard bezel assembly connector and cable

Table 11. Keyboard bezel assembly

No.	Connector/feature	Internal cable required	Cable connection
<b>1</b>	Fingerprint reader card connector (internal)	Fingerprint reader card cable	The keyboard bezel assembly comes with a fingerprint reader card cable. Connect the cable to this connector.

### Smart card reader connector and cable

Table 12. Smart card reader

No.	Connector/feature	Internal cable required	Cable connection
<b>1</b>	Smart card reader connector (internal)	Smart-card cable	Connect one end to the system board and the other end to this connector.

## Trackpad connector and cable

Table 13. Trackpad

No.	Connector/feature	Internal cable required	Cable connection
<b>1</b>	Trackpad connector (internal)	Trackpad cable	Connect one end to the trackpad connector on the system board and the other end to this connector.

## USB and audio card connectors

Table 14. USB and audio card

No.	Connector/feature	Internal cable required	Cable connection
<b>1</b>	USB and audio card connector (internal)	No	Connect the USB and audio card to the system board directly.
<b>2</b>	Always On USB connector (external)	No	Insert USB-compatible devices into the USB connector.
<b>3</b>	Audio connector (external)	No	Connect headphones or a headset with a 3.5-mm (0.14-inch), 4-pole plug to the audio connector.

## VGA card connectors

Table 15. VGA card

No.	Connector/feature	Internal cable required	Cable connection
<b>1</b>	VGA connector (external)	No	Connect a compatible projector, external monitor, or high-definition television to this connector.
<b>2</b>	VGA card connector (internal)	No	Connect the VGA card to the system board directly.

**Wireless-WAN card connectors and cables**

Table 16. Wireless-WAN card

No.	Connector/feature	Internal cable required	Cable connection
<b>1</b>	Wireless-WAN antenna connector (internal)	Wireless-WAN antenna kit	Connect one end of the wireless-WAN orange antenna to the A-cover and the other end to this connector.
<b>2</b>	Wireless-WAN antenna connector (internal)	Wireless-WAN antenna kit	Connect one end of the wireless-WAN blue antenna to the A-cover and the other end to this connector.

**Wireless-LAN card connectors and cables**

Table 17. Wireless-LAN card

No.	Connector/feature	Internal cable required	Cable connection
<b>1</b>	Wireless-LAN antenna connector (internal)	Wireless-LAN antenna kit	Connect one end of the wireless-LAN gray antenna to the A-cover and the other end to this connector.
<b>2</b>	Wireless-LAN antenna connector (internal)	Wireless-LAN antenna kit	Connect one end of the wireless-LAN black antenna to the A-cover and the other end to this connector.

---

## Looking up FRU information

For detailed FRU information, including part numbers, descriptions, and substitution part numbers, go to:  
<http://www.lenovo.com/serviceparts-lookup>

---

## Chapter 7. FRU replacement notices

This chapter presents notices related to removing and replacing parts. Read this chapter carefully before replacing any FRU.

### CRU statement for customers:

You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual can be found at <http://www.lenovo.com/support>. Click **Guides & Manuals** and then follow the on-screen instructions to find the manual for your product. You might be required to return the defective part that is replaced by the CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective CRU within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

---

## Screw notices

Loose screws can cause a reliability problem. In the ThinkPad notebook computer, this problem is addressed with special nylon-coated screws that have the following characteristics:

- They maintain tight connections.
- They do not easily come loose, even with shock or vibration.
- They are harder to tighten.

Do the following when you service this machine:

- Keep the screw kit in your tool bag. For the part number of the screw kit, go to <http://www.lenovo.com/serviceparts-lookup>.
- It is recommended to use new screws.
- It is recommended to use each screw only once.

Tighten screws as follows:

- **Plastic to plastic**

Turn an additional 90 degrees after the screw head touches the surface of the plastic part.

- **Logic card to plastic**

Turn an additional 180 degrees after the screw head touches the surface of the logic card.

#### Notes:

- Ensure that you use the correct screw. It is recommended to use new screws for replacements. If you have a torque screwdriver, tighten all screws firmly to the torque specified in the screw information table for each step.
- Ensure that torque screwdrivers are calibrated correctly following country specifications.

---

## Retaining serial numbers

This topic provides instructions on the following:

- “Restoring the serial number of the system unit” on page 64
- “Retaining the UUID” on page 65

## Restoring the serial number of the system unit

When the computer was manufactured, the EEPROM on the system board was loaded with the serial numbers of the system and all major components. These numbers need to remain the same throughout the life of the computer.

If you replace the system board, you must restore the serial number of the system unit to its original value.

The serial number of the system unit is written on the label attached to the bottom of the computer.

If you cannot find the serial number of the system unit on the bottom of the computer, try the following method to get the number:

**Note:** Before you perform the operation, ensure that the UEFI/Legacy setting within the **Startup** menu in the ThinkPad Setup program is set to **UEFI Only**.

1. Connect a USB memory key to the computer.
2. Go to <http://www.lenovo.com/maintenanceutilities> and follow the instructions on the screen to create a Maintenance Key.

**Note:** Only an authorized Lenovo service technician can access the above Web site.

3. Restart the computer.
4. When the logo is displayed, press Esc. The ThinkPad Config Information Update Utility interface is displayed.
5. Type 1 under **Enter the action desired**, then press Enter. The ThinkPad Serial Number Update Utility for Asset ID screen is displayed.
6. Type 2 under **Enter the action desired**, then press Enter. The serial number of each device in your computer is displayed; the serial number of the system unit is listed as follows:  
**20-** Serial number
7. Record the serial number of the system unit.

After you replace the system board, do the following to restore the serial number of the system unit:

1. Connect the Maintenance Key to the computer.

2. When the logo is displayed, press Esc. The ThinkPad Config Information Update Utility interface is displayed.
3. Type 1 under **Enter the action desired**, then press Enter. The ThinkPad Serial Number Update Utility for Asset ID screen is displayed.
4. Type 1 under **Enter the action desired**, then press Enter. Then follow the instructions on the screen to restore the serial number of the system unit.

## Retaining the UUID

The Universally Unique Identifier (UUID) is a 128-bit number uniquely assigned to your computer at production and stored in the EEPROM of your system board.

The algorithm that generates the number is designed to provide unique IDs until the year A.D. 3400. No two computers in the world have the same number.

When you replace the system board, perform the following steps to create a new UUID for the system board if the system board does not have a UUID:

**Note:** Before you perform the operation, ensure that the UEFI/Legacy setting within the **Startup** menu in the ThinkPad Setup program is set to **UEFI Only**.

1. Connect a USB memory key to the computer.
2. Go to <http://www.lenovo.com/maintenanceutilities> and follow the instructions on the screen to create a Maintenance Key.

**Note:** Only an authorized Lenovo service technician can access the above Web site.

3. Restart the computer.
4. When the logo screen is displayed, press Esc. The ThinkPad Config Information Update Utility interface is displayed.
5. Type 2 under **Enter the action desired**, then press Enter. The Auto UUID generation utility interface is displayed.
6. Type y under **Change UUID. OK? [Y/N]**, then press Enter. A new UUID is created and written. If a valid UUID already exists, it is not overwritten.

## Reading or writing the ECA information

Information about Engineering Change Announcements (ECA) is stored in the EEPROM of the system board. The electronic storage of this information simplifies the procedure to check if the ECA has been previously applied to a machine. The machine does not need to be disassembled to check for the ECA application.

To check what ECAs have been previously applied to the machine, use the ECA Information Read/Write function on the LENOVO ThinkPad Hardware Maintenance Diskette or Maintenance Key.

1. Insert the latest version of LENOVO ThinkPad Hardware Maintenance Diskette or Maintenance Key, and then restart the computer.
2. From the main menu, select **6. Set ECA Information**.
3. To read the ECA information, select **2. Read ECA/rework number from EEPROM** and follow the instructions on the screen; To read box build date, select **5. Read box build date from EEPROM**, and follow the instructions on the screen.

After an ECA has been applied to the machine, the EEPROM must be updated to reflect the ECA's application. Use the latest version of LENOVO ThinkPad Hardware Maintenance Diskette or Maintenance Key to update the EEPROM.

**Note:** Only the ECA number is stored in the EEPROM. The machine type of the ECA is assumed to be the same as the machine type of the machine that had the ECA applied to it.

1. Insert the latest version of LENOVO ThinkPad Hardware Maintenance Diskette or Maintenance Key, and then restart the computer.
2. From the main menu, select **6. Set ECA Information**.
3. To write the ECA information, select **1. Write ECA/rework number from EEPROM**, and follow the instruction; To write box build date, select **4. Write box build date from EEPROM**, and follow the instruction on the screen.

If the system board is being replaced, try to read the ECA information from the old system board and transfer the information to the new system. If the system board is inoperable, this will not be possible.

---

## Chapter 8. Removing or replacing a FRU

This chapter provides instructions on how to remove or replace a FRU.

### CRU statement for customers:

You can resolve some problems with your product with a replacement part you can install yourself, called a “Customer Replaceable Unit” or “CRU.” Some CRUs are designated as self-service CRUs and others are designated as optional-service CRUs. *Installation of self-service CRUs is your responsibility. For optional-service CRUs, you can either install the CRU yourself or you can request that a Service Provider install the CRU according to the warranty service for your product.* If you intend on installing the CRU, Lenovo will ship the CRU to you. CRU information and replacement instructions are shipped with your product and are available from Lenovo at any time upon request. You can find a list of CRUs for your product in this *Hardware Maintenance Manual*. An electronic version of this manual is available for downloading at <http://www.lenovo.com/support>. You might be required to return the defective CRU. When return is required: (1) return instructions, a prepaid shipping label, and a container will be included with the replacement CRU; and (2) you might be charged for the replacement CRU if Lenovo does not receive the defective part within thirty (30) days of your receipt of the replacement CRU. See your Lenovo Limited Warranty documentation for full details.

---

### General guidelines

When removing or replacing a FRU, be sure to observe the following general guidelines:

1. Do not try to service any computer unless you have been trained and certified. An untrained person runs the risk of damaging parts.
2. Before replacing any FRU, review Chapter 7 “FRU replacement notices” on page 63.
3. Begin by removing any FRUs that have to be removed before replacing the failing FRU. Any such FRUs are listed at the beginning of each FRU replacement section. Remove them in the order in which they are listed.
4. Follow the correct sequence in the steps for removing a FRU, as given in the illustrations by the numbers in square callouts.
5. When turning a screw, turn it in the direction as given by the arrow in the illustration.
6. When removing a FRU, move it in the direction as given by the arrow in the illustration.
7. To put the new FRU in place, reverse the removal procedure and follow any notes that pertain to replacement.
8. When replacing a FRU, use the correct screws as shown in the replacement procedures.

#### **DANGER**

**Before removing any FRU, turn off the computer, unplug all power cords from electrical outlets, and then disconnect any interconnecting cables.**

**Attention:** After replacing a FRU, do not turn on the computer until you have made sure that all screws, springs, and other small parts are in place and none are loose inside the computer. Verify this by shaking the computer gently and listening for rattling sounds. Metallic parts or metal flakes can cause electrical short circuits.

**Attention:** The system board is sensitive to, and can be damaged by, electrostatic discharge (ESD). Before touching it, establish personal grounding by touching a ground point with one hand or by using an electrostatic discharge strap.

---

## 1010 SIM-card tray

### Removal steps of the SIM-card tray

---

## 1020 External battery pack

### Important notices for replacing a battery pack

**Attention:** Lenovo has no responsibility for the performance or safety of unauthorized batteries, and provides no warranties for failures or damage arising out of their use.

The Lenovo Solution Center program provides an automatic battery diagnostic test that determines if the battery pack is defective. A battery pack FRU should not be replaced unless this diagnostic test shows that the battery is defective. The only exception to this is if the battery pack is physically damaged or a customer is reporting a possible safety issue.

If the Lenovo Solution Center program is not installed on the computer, the customer should download and install the program to diagnose the battery pack, before getting a non-physically damaged battery pack replaced. Note that the replacement of a physically damaged battery pack is not covered by the warranty.

### Removal steps of the external battery pack

**Use only the authorized battery specified for your computer. Any other battery could ignite or explode.**

**Note:** Depending on the computer model, your computer might look different from the following illustration.

Slide the battery latch **1** to the unlocked position, and detach the battery **2** from the base cover on the left.

Slide the other battery latch **3** to the unlocked position, and detach the battery **4** from the base cover on the right.

Remove the battery **5**.

---

## 1030 Keyboard rubbers

For access, remove this FRU:

- “1020 External battery pack” on page 68

## Removal steps of the keyboard rubbers

**Note:** Depending on the computer model, your computer might look different from the following illustration.

---

## 1040 Keyboard

For access, remove these FRUs in order:

- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69

## Removal steps of the keyboard

### Notes:

- Depending on the computer model, your computer might look different from the illustrations in this topic.
- Do not press or hold the keys while sliding the keyboard frame. Otherwise, the keyboard frame cannot be moved.

Reveal the screw heads beneath the keyboard frame by sliding the keyboard forward by 2.5 mm (0.1 inches).

Loosen the screws.

Pivot the keyboard slightly upward until you can see the connectors on the bottom side of the keyboard. Then turn over the keyboard.

Put the keyboard on the palm rest and detach the connectors. Then remove the keyboard.

---

## 1050 Base cover assembly

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69

**Note:** Depending on the computer model, your computer might look different from the illustrations in this topic.

### Removal steps of the base cover assembly

**Note:** Loosen the screws **1**. The screws **1** cannot be removed.

### Applying labels to the base cover assembly:

The new base cover assembly is shipped with a kit containing labels of several kinds. Apply those labels when you replace the base cover assembly. For the labels that are not shipped with the new base cover assembly, peel them from the old base cover assembly, and adhere them to the new one.

The following illustration shows the location of each label.

<b>1</b> Asset tag	<b>2</b> S/N label
<b>3</b> POD system label	<b>4</b> WWAN MAC label
<b>5</b> NFC-FCC label	<b>6</b> POD GEO label (for U.S, Australia and New Zealand, Asia Pacific/Latin America, Europe, Middle East and Africa, Japan, or Taiwan)
<b>7</b> FCC label, Indonesia postel label, Argentina CNC label, Taiwan WWAN label, or INDIA BIS label	<b>8</b> IMEI label
<b>9</b> CECP label	<b>10</b> Genuine Microsoft (GM) label
<b>11</b> Certificate of authenticity (COA) label	<b>12</b> Israel Homo (WL/BT/3G) label, GEO CN label, Argentina adapter label, KCC label/KR safety label, Indonesia Rating label, or Non-encryption label
<b>13</b> China WWAN label	<b>14</b> China 3G WWAN label
<b>15</b> China 3G LOGO WWAN label	<b>16</b> Brazil Anatel (WL/BT/3G) label
<b>17</b> China TELCOM label	<b>18</b> ICASA label

## 1060 Docking bracket

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

## Removal steps of the docking bracket

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 5 mm, flat-head, nylon-coated (3)	Silver	0.181 Nm (1.85 kgf-cm)

## 1070 SIM-card filler

For access, remove these FRUs in order:

- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

## Removal steps of the SIM-card filler

---

## 1080 Hard disk drive or solid-state drive

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

### Attention:

- Do not drop the drive or apply any physical shock to it. The drive is sensitive to physical shock. Improper handling can cause damage and permanent loss of data.
- Before removing the drive, have the user make a backup copy of all the information on it if possible.
- Never remove the drive while the system is operating or in suspend mode.

## Removal steps of the hard disk drive or solid-state drive

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 3 mm, flat-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

**When installing:**

Ensure that the hard disk drive or solid-state drive is firmly attached.

---

## 1090 Wireless-LAN card

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

## Removal steps of the Wireless-LAN card

Step	Screw (quantity)	Color	Torque
<b>2</b>	M2 × 3 mm, flat-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

### When installing:

Plug the gray cable into the connector labeled **Main** on the card, and plug the black cable into the connector labeled **Aux** on the card.

## 1100 Wireless-WAN card

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

### Removal steps of the wireless-WAN card

Step	Screw (quantity)	Color	Torque
2	M2 × 3 mm, flat-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

### When installing:

Plug the orange cable into the connector labeled **MAIN** on the card, and plug the blue cable into the connector labeled **AUX** on the card.

## 1110 Memory module

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

### Removal steps of the memory module

### When installing:

Insert the notched end of the memory module into the memory slot. Press the memory module in firmly, and pivot it downward until it snaps into place. Ensure that the memory module is firmly installed in the slot and does not move easily.

**Note:** If you install only one memory module, install it into the upper slot.

---

## 1120 Speaker assembly and speaker rubbers

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

### Removal steps of the speaker assembly and speaker rubbers

Step	Screw (quantity)	Color	Torque
3	M2 × 4 mm, big head, nylon-coated (4)	Black	0.181 Nm (1.85 kgf-cm)

**When installing:**

- Ensure that the speaker rubbers are well installed.
- Ensure that the connector of the speaker assembly is attached firmly.
- Route the cables as shown in the following illustration.

**Attention:** As you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

## 1130 Coin-cell battery

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

**Use only the authorized battery specified for your computer. Any other battery could ignite or explode.**

## Removal steps of the coin-cell battery

### When installing:

Ensure that the connector of the coin-cell battery is attached firmly.

---

## 1140 LCD unit

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

### Removal steps of the LCD unit

Step	Screw (quantity)	Color	Torque
<b>7</b>	M2.5 × 6 mm, flat-head, nylon-coated (4)	Black	0.294 Nm (3.0 kgf-cm)
<b>8</b>	M2 × 5 mm, flat-head, nylon-coated (2)	Silver	0.181 Nm (1.85 kgf-cm)

**When installing:**

- Ensure that the connectors are attached firmly.
- Ensure that the cables are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

---

## 1150 dc-in cable

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

### Removal steps of the dc-in cable

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2.5 × 6 mm, flat-head, nylon-coated (2)	Black	0.294 Nm (3.0 kgf-cm)
<b>2</b>	M2 × 5 mm, flat-head, nylon-coated (1)	Silver	0.181 Nm (1.85 kgf-cm)

**When installing:**

Ensure that the connector of the dc-in cable is attached firmly.

## 1160 Thermal fan assembly

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

### Removal steps of the thermal fan assembly

#### Notes:

- Loosen the screws **3** in ascending alphabetical order as illustrated. The screws **3** cannot be removed.
- The screws **3e**, **3f**, and **3g** are available only on some computer models.

#### When installing:

- Ensure that the connector of the thermal fan is attached firmly.

- Before you attach the thermal fan assembly to the computer, apply thermal grease, at an amount of 0.2 grams, on the parts marked **a** and **b** as shown in the following illustrations. Either too much or too less application of grease can cause a thermal problem due to imperfect contact with a component. For the new thermal fan assembly, you must peel the thin film off from the rubbers.

**For integrated-graphics models**

**For discrete-graphics models**

---

## 1170 I/O bracket

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

### Removal steps of the I/O bracket

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2.5 × 6 mm, flat-head, nylon-coated (2)	Black	0.294 Nm (3.0 kgf-cm)
<b>2</b>	M2 × 5 mm, flat-head, nylon-coated (3)	Silver	0.181 Nm (1.85 kgf-cm)

Use the hex bit socket to remove the hexagonal screws.

Step	Screw (quantity)	Color	Torque
<b>4</b>	Hexagonal screws (2)	Black	0.181 Nm (1.85 kgf-cm)

**When installing:**

Ensure that the I/O bracket is attached firmly.

---

## 1180 Smart-card bracket

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72
- “1130 Coin-cell battery” on page 81
- “1120 Speaker assembly and speaker rubbers” on page 80

### Removal steps of the smart-card bracket

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 3 mm, flat-head, nylon-coated (4)	Black	0.181 Nm (1.85 kgf-cm)
<b>2</b>	M2 × 5 mm, flat-head, nylon-coated (1)	Silver	0.181 Nm (1.85 kgf-cm)

## 1190 M.2 solid-state drive and M.2 solid-state drive adapter in the hard disk drive bay

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

### Attention:

- Do not drop the drive or apply any physical shock to it. The drive is sensitive to physical shock. Improper handling can cause damage and permanent loss of data.
- Before removing the drive, have the user make a backup copy of all the information on it if possible.
- Never remove the drive while the system is operating or in suspend mode.

### Removal steps of the M.2 solid-state drive and M.2 solid-state drive adapter in the hard disk drive bay

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 3 mm, flat-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

**When installing:**

Ensure that the M.2 solid-state drive is firmly attached.

## 1200 M.2 solid-state drive in the wireless-WAN-card slot

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

### Removal steps of the M.2 solid-state drive in the wireless-WAN-card slot

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 3 mm, flat-head, nylon-coated (1)	Black	0.181 Nm (1.85 kgf-cm)

## 1210 System board and subcards

### Important notices for handling the system board

When handling the system board, read the following:

- The system board has an accelerometer, which can be broken when several thousands of G-forces are applied.

**Note:** Dropping a system board from a height of as little as 6 inches so that it falls flat on a hard bench can subject the accelerometer to as much as 6000 G's of shock.

- Be careful not to drop the system board on a bench top that has a hard surface, such as metal, wood, or composite.
- Avoid rough handling of any kind.
- At every point in the process, be sure not to drop or stack the system board.
- If you put a system board down, be sure to put it only on a padded surface such as an ESD mat or a corrugated conductive material.

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72
- “1080 Hard disk drive or solid-state drive” on page 76
- “1090 Wireless-LAN card” on page 77
- “1100 Wireless-WAN card” on page 78
- “1110 Memory module” on page 79
- “1130 Coin-cell battery” on page 81
- “1180 Smart-card bracket” on page 89
- “1160 Thermal fan assembly” on page 86
- “1170 I/O bracket” on page 87

**Attention:** The following components soldered on the top side of the system board are extremely sensitive. When you service the system board, avoid any kind of rough handling.

#### For models with a discrete thermal module

- a** Microprocessor
- b** Graphics Processing Unit (GPU)

**For models with an integrated thermal module**

**a** Microprocessor

**Removal steps of the system board**

Step	Screw (quantity)	Color	Torque
<b>7</b>	M2 × 3 mm, big head, nylon-coated (4)	Black	0.181 Nm (1.85 kgf-cm)

Step	Screw (quantity)	Color	Torque
9	M2 × 3 mm, big head, nylon-coated (4)	Black	0.181 Nm (1.85 kgf-cm)

**When installing:**

Ensure that the connectors are attached firmly.

## 1211 Smart card reader and smart-card cable, or smart-card filler

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72
- “1130 Coin-cell battery” on page 81
- “1180 Smart-card bracket” on page 89

- “1210 System board and subcards” on page 92

### Removal steps of the smart card reader and smart-card cable

### Removal steps of the smart-card filler

---

## 1212 Keyboard bezel assembly

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1040 Keyboard” on page 70
- “1050 Base cover assembly” on page 72
- “1080 Hard disk drive or solid-state drive” on page 76
- “1090 Wireless-LAN card” on page 77
- “1100 Wireless-WAN card” on page 78
- “1110 Memory module” on page 79

- “1120 Speaker assembly and speaker rubbers” on page 80
- “1130 Coin-cell battery” on page 81
- “1140 LCD unit” on page 82
- “1150 dc-in cable” on page 84
- “1160 Thermal fan assembly” on page 86
- “1170 I/O bracket” on page 87
- “1180 Smart-card bracket” on page 89
- “1210 System board and subcards” on page 92
- “1211 Smart card reader and smart-card cable, or smart-card filler” on page 95

---

## 2010 LCD-bezel sheet

For access, remove this FRU:

- “1140 LCD unit” on page 82

### Removal steps of the LCD-bezel sheet

### When installing:

Ensure that all the latches are attached firmly.

## 2020 LCD panel

For access, remove these FRUs in order:

- “1140 LCD unit” on page 82
- “2010 LCD-bezel sheet” on page 97

### Removal steps of the LCD panel

Step	Screw (quantity)	Color	Torque
<b>1</b>	M2 × 3 mm, flat-head, nylon-coated (4)	Black	0.181 Nm (1.85 kgf-cm)

### When installing:

1. Insert the bottom edge of the LCD panel at an angle of about 30 degrees.
2. Install the LCD panel. Ensure that all the latches are attached firmly.

---

## 2030 Camera/microphone module, camera module, or microphone module

For access, remove these FRUs in order:

- “1140 LCD unit” on page 82
- “2010 LCD-bezel sheet” on page 97

### Removal steps of the camera/microphone module, camera module, or microphone module

### When installing:

Ensure that the connector of the camera/microphone module, camera module, or microphone module is attached firmly.

---

## 2040 LCD hinges

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72
- “1140 LCD unit” on page 82
- “2010 LCD-bezel sheet” on page 97
- “2020 LCD panel” on page 98

### Removal steps of the LCD hinges

Step	Screw (quantity)	Color	Torque
<b>2</b>	M2.5 × 2.5 mm, big-head, nylon-coated (6)	Silver	0.294 Nm (3.0 kgf-cm)

## 2050 LCD cable

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72
- “1140 LCD unit” on page 82
- “2010 LCD-bezel sheet” on page 97
- “2020 LCD panel” on page 98

## Removal steps of the LCD cable

## 2060 Wireless-LAN/WAN antenna assembly or wireless-LAN antenna assembly, and LCD rear-cover assembly

For access, remove these FRUs in order:

- “1010 SIM-card tray” on page 68
- “1020 External battery pack” on page 68
- “1030 Keyboard rubbers” on page 69
- “1050 Base cover assembly” on page 72

- “1140 LCD unit” on page 82
- “2010 LCD-bezel sheet” on page 97
- “2020 LCD panel” on page 98
- “2040 LCD hinges” on page 100

**Removal steps of the wireless-LAN/WAN antenna assembly or wireless-LAN antenna assembly, and LCD rear-cover assembly**

**When installing:**

Route the cables as shown in the following illustration.

**Attention:** As you route the cables, ensure that they are not subject to any tension. Tension could cause the cables to be damaged by the cable guides, or a wire to be broken.

**Antenna locations**

- a** Wireless-LAN main antenna (gray)
- b** Wireless-WAN main antenna (orange)
- c** Wireless-WAN auxiliary antenna (blue)
- d** Wireless-LAN auxiliary antenna (black)

---

## Appendix A. Notices

Lenovo may not offer the products, services, or features discussed in this document in all countries. Consult your local Lenovo representative for information about the products and services currently available in your area. Any reference to a Lenovo product, program, or service is not intended to state or imply that only that Lenovo product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any Lenovo intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any other product, program, or service.

Lenovo may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

## Appendix B. Abbreviation table

The following table lists all abbreviations and acronyms used in this manual.

Abbreviation	Term
3G	third generation of mobile telecommunications technology
BGA	Ball Grid Array
BIOS	basic input/output system
CMOS	complementary metal-oxide semiconductor
COA	Certificate of Authentication
CRC	cyclic redundancy check
CRT	cathode ray tube
CRU	customer-replaceable unit
CTO	configure to order
EAIA	Enhanced Asset Information Area
ECA	Engineering Change Announcements
EEPROM	Electrically Erasable Programmable Read-Only Memory
EFI	Extensible Firmware Interface
EPO	emergency power-off
ESD	electrostatic discharge
EU	European Union
FCC	Federal Communications Commission
FRU	Field Replaceable Unit
GAV	General Announce Variant
GPU	graphics processing unit
HDD	hard disk drive
HDMI	high-definition multimedia interface
ICs	integrated circuits
ICCID	integrate circuit card identity
ISO	International Standardization Organization
LAN	local area network
LCD	liquid crystal display
MAC	media access control
MT	machine type
MTM	machine type and model
PC	personal computer
PCH	Platform Controller Hub
POST	power-on self-test
RAM	random-access memory

<b>Abbreviation</b>	<b>Term</b>
RF	radio frequency
RFID	radio-frequency identification
RI	ring indicator
RJ	registered jack
SATA	Serial Advanced Technology Attachment
SIM	subscriber identity module
SVP	supervisor password
TFTs	thin-film transistors
UEFI	Unified Extensible Firmware Interface
USB	Universal Serial Bus
UUID	universally unique identifier
VGA	video graphics array
VRAM	video random-access memory
WAN	wide area network
